Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60400.

What is the most honest thing you can say about your relationship to your own fallibility?

60402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60425.

What is the most honest thing you can say about your relationship to your own fallibility?

60427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60450.

What is the most honest thing you can say about your relationship to your own fallibility?

60452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60475.

What is the most honest thing you can say about your relationship to your own fallibility?

60477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60500.

What is the most honest thing you can say about your relationship to your own fallibility?

60502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60525.

What is the most honest thing you can say about your relationship to your own fallibility?

60512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60550.

What is the most honest thing you can say about your relationship to your own fallibility?

60552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60575.

What is the most honest thing you can say about your relationship to your own fallibility?

60577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60603.

60605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60600.

What is the most honest thing you can say about your relationship to your own fallibility?

60602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60625.

What is the most honest thing you can say about your relationship to your own fallibility?

60627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60650.

What is the most honest thing you can say about your relationship to your own fallibility?

60652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60675.

What is the most honest thing you can say about your relationship to your own fallibility?

60677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60700.

What is the most honest thing you can say about your relationship to your own fallibility?

60702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60725.

What is the most honest thing you can say about your relationship to your own fallibility?

60727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60750.

What is the most honest thing you can say about your relationship to your own fallibility?

60751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60775.

What is the most honest thing you can say about your relationship to your own fallibility?

60777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60800.

What is the most honest thing you can say about your relationship to your own fallibility?

60802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60850.

What is the most honest thing you can say about your relationship to your own fallibility?

60852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60875.

What is the most honest thing you can say about your relationship to your own fallibility?

60877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60900.

What is the most honest thing you can say about your relationship to your own fallibility?

60902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60925.

What is the most honest thing you can say about your relationship to your own fallibility?

60912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60950.

What is the most honest thing you can say about your relationship to your own fallibility?

60952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

60960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

60975.

What is the most honest thing you can say about your relationship to your own fallibility?

60977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

60979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

60981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

60983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

60985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

60987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

60989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

60976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

60978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

60980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

60984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

60986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

60988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

60990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

60991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

60993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

60995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

60997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

60999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

60992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

60994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

60996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

60998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61000.

What is the most honest thing you can say about your relationship to your own fallibility?

61002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61025.

What is the most honest thing you can say about your relationship to your own fallibility?

61027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61050.

What is the most honest thing you can say about your relationship to your own fallibility?

61052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61075.

What is the most honest thing you can say about your relationship to your own fallibility?

61077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61100.

What is the most honest thing you can say about your relationship to your own fallibility?

61102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61125.

What is the most honest thing you can say about your relationship to your own fallibility?

61127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61150.

What is the most honest thing you can say about your relationship to your own fallibility?

61151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61175.

What is the most honest thing you can say about your relationship to your own fallibility?

61177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61200.

What is the most honest thing you can say about your relationship to your own fallibility?

61202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61225.

What is the most honest thing you can say about your relationship to your own fallibility?

61227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61250.

What is the most honest thing you can say about your relationship to your own fallibility?

61252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61265.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61267.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61269.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61271.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61273.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61275.

What is the most honest thing you can say about your relationship to your own fallibility?

61277.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61264.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61266.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61268.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61270.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61272.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61274.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61276.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61278.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61300.

What is the most honest thing you can say about your relationship to your own fallibility?

61302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61325.

What is the most honest thing you can say about your relationship to your own fallibility?

61312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61350.

What is the most honest thing you can say about your relationship to your own fallibility?

61352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61375.

What is the most honest thing you can say about your relationship to your own fallibility?

61377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61400.

What is the most honest thing you can say about your relationship to your own fallibility?

61402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61425.

What is the most honest thing you can say about your relationship to your own fallibility?

61427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61450.

What is the most honest thing you can say about your relationship to your own fallibility?

61452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61475.

What is the most honest thing you can say about your relationship to your own fallibility?

61477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61500.

What is the most honest thing you can say about your relationship to your own fallibility?

61502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61525.

What is the most honest thing you can say about your relationship to your own fallibility?

61527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61550.

What is the most honest thing you can say about your relationship to your own fallibility?

61551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61575.

What is the most honest thing you can say about your relationship to your own fallibility?

61577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61600.

What is the most honest thing you can say about your relationship to your own fallibility?

61602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61625.

What is the most honest thing you can say about your relationship to your own fallibility?

61627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61650.

What is the most honest thing you can say about your relationship to your own fallibility?

61652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61675.

What is the most honest thing you can say about your relationship to your own fallibility?

61677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61700.

What is the most honest thing you can say about your relationship to your own fallibility?

61702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61725.

What is the most honest thing you can say about your relationship to your own fallibility?

61712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61750.

What is the most honest thing you can say about your relationship to your own fallibility?

61752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61775.

What is the most honest thing you can say about your relationship to your own fallibility?

61777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61800.

What is the most honest thing you can say about your relationship to your own fallibility?

61802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61815.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61817.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61819.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61821.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61816.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61818.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61820.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61822.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61823.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61825.

What is the most honest thing you can say about your relationship to your own fallibility?

61827.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61829.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61824.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61826.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61828.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61830.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61850.

What is the most honest thing you can say about your relationship to your own fallibility?

61852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61875.

What is the most honest thing you can say about your relationship to your own fallibility?

61877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61900.

What is the most honest thing you can say about your relationship to your own fallibility?

61902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61925.

What is the most honest thing you can say about your relationship to your own fallibility?

61927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61950.

What is the most honest thing you can say about your relationship to your own fallibility?

61951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61975.

What is the most honest thing you can say about your relationship to your own fallibility?

61977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

61979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

61981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

61968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

61976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

61978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

61980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

61982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

61983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

61985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

61987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

61989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

61991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

61993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

61995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

61997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

61984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

61986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

61988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

61990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

61992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

61994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

61996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

61998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

61999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62000.

What is the most honest thing you can say about your relationship to your own fallibility?

62002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62025.

What is the most honest thing you can say about your relationship to your own fallibility?

62027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62050.

What is the most honest thing you can say about your relationship to your own fallibility?

62052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62075.

What is the most honest thing you can say about your relationship to your own fallibility?

62077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62100.

What is the most honest thing you can say about your relationship to your own fallibility?

62102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62125.

What is the most honest thing you can say about your relationship to your own fallibility?

62112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62150.

What is the most honest thing you can say about your relationship to your own fallibility?

62152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62175.

What is the most honest thing you can say about your relationship to your own fallibility?

62177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62200.

What is the most honest thing you can say about your relationship to your own fallibility?

62202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62225.

What is the most honest thing you can say about your relationship to your own fallibility?

62227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62250.

What is the most honest thing you can say about your relationship to your own fallibility?

62252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62265.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62267.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62269.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62264.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62266.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62268.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62270.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62271.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62273.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62275.

What is the most honest thing you can say about your relationship to your own fallibility?

62277.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62272.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62274.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62300.

What is the most honest thing you can say about your relationship to your own fallibility?

62302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62325.

What is the most honest thing you can say about your relationship to your own fallibility?

62327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62350.

What is the most honest thing you can say about your relationship to your own fallibility?

62351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62369.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62400.

What is the most honest thing you can say about your relationship to your own fallibility?

62402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62425.

What is the most honest thing you can say about your relationship to your own fallibility?

62427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62450.

What is the most honest thing you can say about your relationship to your own fallibility?

62452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62475.

What is the most honest thing you can say about your relationship to your own fallibility?

62477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62500.

What is the most honest thing you can say about your relationship to your own fallibility?

62502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62525.

What is the most honest thing you can say about your relationship to your own fallibility?

62512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62550.

What is the most honest thing you can say about your relationship to your own fallibility?

62552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62575.

What is the most honest thing you can say about your relationship to your own fallibility?

62577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62600.

What is the most honest thing you can say about your relationship to your own fallibility?

62602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62625.

What is the most honest thing you can say about your relationship to your own fallibility?

62627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62650.

What is the most honest thing you can say about your relationship to your own fallibility?

62652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62675.

What is the most honest thing you can say about your relationship to your own fallibility?

62677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62700.

What is the most honest thing you can say about your relationship to your own fallibility?

62702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62725.

What is the most honest thing you can say about your relationship to your own fallibility?

62727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62750.

What is the most honest thing you can say about your relationship to your own fallibility?

62751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62775.

What is the most honest thing you can say about your relationship to your own fallibility?

62777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62800.

What is the most honest thing you can say about your relationship to your own fallibility?

62802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62850.

What is the most honest thing you can say about your relationship to your own fallibility?

62852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62875.

What is the most honest thing you can say about your relationship to your own fallibility?

62877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62900.

What is the most honest thing you can say about your relationship to your own fallibility?

62902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62925.

What is the most honest thing you can say about your relationship to your own fallibility?

62912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62950.

What is the most honest thing you can say about your relationship to your own fallibility?

62952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

62960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

62975.

What is the most honest thing you can say about your relationship to your own fallibility?

62977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

62979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

62981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

62983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

62985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

62987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

62989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

62976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

62978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

62980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

62984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

62986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

62988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

62990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

62991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

62993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

62995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

62997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

62999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

62992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

62994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

62996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

62998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63000.

What is the most honest thing you can say about your relationship to your own fallibility?

63002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63025.

What is the most honest thing you can say about your relationship to your own fallibility?

63027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63050.

What is the most honest thing you can say about your relationship to your own fallibility?

63052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63075.

What is the most honest thing you can say about your relationship to your own fallibility?

63077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63100.

What is the most honest thing you can say about your relationship to your own fallibility?

63102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63125.

What is the most honest thing you can say about your relationship to your own fallibility?

63127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63150.

What is the most honest thing you can say about your relationship to your own fallibility?

63151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63175.

What is the most honest thing you can say about your relationship to your own fallibility?

63177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63200.

What is the most honest thing you can say about your relationship to your own fallibility?

63202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63225.

What is the most honest thing you can say about your relationship to your own fallibility?

63227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63250.

What is the most honest thing you can say about your relationship to your own fallibility?

63252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63300.

What is the most honest thing you can say about your relationship to your own fallibility?

63302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63325.

What is the most honest thing you can say about your relationship to your own fallibility?

63312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63350.

What is the most honest thing you can say about your relationship to your own fallibility?

63352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63375.

What is the most honest thing you can say about your relationship to your own fallibility?

63377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63400.

What is the most honest thing you can say about your relationship to your own fallibility?

63402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63425.

What is the most honest thing you can say about your relationship to your own fallibility?

63427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63450.

What is the most honest thing you can say about your relationship to your own fallibility?

63452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63475.

What is the most honest thing you can say about your relationship to your own fallibility?

63477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63525.

What is the most honest thing you can say about your relationship to your own fallibility?

63527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63550.

What is the most honest thing you can say about your relationship to your own fallibility?

63551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63575.

What is the most honest thing you can say about your relationship to your own fallibility?

63577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63600.

What is the most honest thing you can say about your relationship to your own fallibility?

63602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63625.

What is the most honest thing you can say about your relationship to your own fallibility?

63627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63650.

What is the most honest thing you can say about your relationship to your own fallibility?

63652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63675.

What is the most honest thing you can say about your relationship to your own fallibility?

63677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63700.

What is the most honest thing you can say about your relationship to your own fallibility?

63702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63725.

What is the most honest thing you can say about your relationship to your own fallibility?

63712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63750.

What is the most honest thing you can say about your relationship to your own fallibility?

63752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63775.

What is the most honest thing you can say about your relationship to your own fallibility?

63777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63800.

What is the most honest thing you can say about your relationship to your own fallibility?

63802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63815.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63817.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63819.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63821.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63816.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63818.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63820.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63822.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63823.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63825.

What is the most honest thing you can say about your relationship to your own fallibility?

63827.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63829.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63824.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63826.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63828.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63830.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63850.

What is the most honest thing you can say about your relationship to your own fallibility?

63852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63875.

What is the most honest thing you can say about your relationship to your own fallibility?

63877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63900.

What is the most honest thing you can say about your relationship to your own fallibility?

63902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63925.

What is the most honest thing you can say about your relationship to your own fallibility?

63927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63950.

What is the most honest thing you can say about your relationship to your own fallibility?

63951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63975.

What is the most honest thing you can say about your relationship to your own fallibility?

63977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

63979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

63981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

63968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

63976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

63978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

63980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

63982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

63983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

63985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

63987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

63989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

63991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

63993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

63995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

63997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

63984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

63986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

63988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

63990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

63992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

63994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

63996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

63998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

63999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64000.

What is the most honest thing you can say about your relationship to your own fallibility?

64002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64025.

What is the most honest thing you can say about your relationship to your own fallibility?

64027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64050.

What is the most honest thing you can say about your relationship to your own fallibility?

64052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64075.

What is the most honest thing you can say about your relationship to your own fallibility?

64077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64100.

What is the most honest thing you can say about your relationship to your own fallibility?

64102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64125.

What is the most honest thing you can say about your relationship to your own fallibility?

64112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64175.

What is the most honest thing you can say about your relationship to your own fallibility?

64177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64200.

What is the most honest thing you can say about your relationship to your own fallibility?

64202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64225.

What is the most honest thing you can say about your relationship to your own fallibility?

64227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64250.

What is the most honest thing you can say about your relationship to your own fallibility?

64252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64265.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64267.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64269.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64264.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64266.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64268.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64270.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64271.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64273.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64275.

What is the most honest thing you can say about your relationship to your own fallibility?

64277.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64272.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64274.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64276.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64278.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64300.

What is the most honest thing you can say about your relationship to your own fallibility?

64302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64325.

What is the most honest thing you can say about your relationship to your own fallibility?

64327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64350.

What is the most honest thing you can say about your relationship to your own fallibility?

64351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64375.

What is the most honest thing you can say about your relationship to your own fallibility?

64377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64400.

What is the most honest thing you can say about your relationship to your own fallibility?

64402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64425.

What is the most honest thing you can say about your relationship to your own fallibility?

64427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64450.

What is the most honest thing you can say about your relationship to your own fallibility?

64452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64475.

What is the most honest thing you can say about your relationship to your own fallibility?

64477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64500.

What is the most honest thing you can say about your relationship to your own fallibility?

64502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64525.

What is the most honest thing you can say about your relationship to your own fallibility?

64512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64550.

What is the most honest thing you can say about your relationship to your own fallibility?

64552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64575.

What is the most honest thing you can say about your relationship to your own fallibility?

64577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64600.

What is the most honest thing you can say about your relationship to your own fallibility?

64602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64625.

What is the most honest thing you can say about your relationship to your own fallibility?

64627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64650.

What is the most honest thing you can say about your relationship to your own fallibility?

64652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64675.

What is the most honest thing you can say about your relationship to your own fallibility?

64677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64700.

What is the most honest thing you can say about your relationship to your own fallibility?

64702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64725.

What is the most honest thing you can say about your relationship to your own fallibility?

64727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64750.

What is the most honest thing you can say about your relationship to your own fallibility?

64751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64775.

What is the most honest thing you can say about your relationship to your own fallibility?

64777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64800.

What is the most honest thing you can say about your relationship to your own fallibility?

64802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64850.

What is the most honest thing you can say about your relationship to your own fallibility?

64852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64875.

What is the most honest thing you can say about your relationship to your own fallibility?

64877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64900.

What is the most honest thing you can say about your relationship to your own fallibility?

64902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64925.

What is the most honest thing you can say about your relationship to your own fallibility?

64912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64950.

What is the most honest thing you can say about your relationship to your own fallibility?

64952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

64960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

64975.

What is the most honest thing you can say about your relationship to your own fallibility?

64977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

64979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

64981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

64983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

64985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

64987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

64989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

64976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

64978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

64980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

64984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

64986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

64988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

64990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

64991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

64993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

64995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

64997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

64999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

64992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

64994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

64996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

64998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65000.

What is the most honest thing you can say about your relationship to your own fallibility?

65002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65025.

What is the most honest thing you can say about your relationship to your own fallibility?

65027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65050.

What is the most honest thing you can say about your relationship to your own fallibility?

65052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65075.

What is the most honest thing you can say about your relationship to your own fallibility?

65077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65100.

What is the most honest thing you can say about your relationship to your own fallibility?

65102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65125.

What is the most honest thing you can say about your relationship to your own fallibility?

65127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65150.

What is the most honest thing you can say about your relationship to your own fallibility?

65151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65175.

What is the most honest thing you can say about your relationship to your own fallibility?

65177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65200.

What is the most honest thing you can say about your relationship to your own fallibility?

65202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65225.

What is the most honest thing you can say about your relationship to your own fallibility?

65227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65250.

What is the most honest thing you can say about your relationship to your own fallibility?

65252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65265.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65267.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65269.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65271.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65273.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65275.

What is the most honest thing you can say about your relationship to your own fallibility?

65277.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65264.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65266.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65268.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65270.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65272.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65274.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65300.

What is the most honest thing you can say about your relationship to your own fallibility?

65302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65325.

What is the most honest thing you can say about your relationship to your own fallibility?

65312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65350.

What is the most honest thing you can say about your relationship to your own fallibility?

65352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65375.

What is the most honest thing you can say about your relationship to your own fallibility?

65377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65400.

What is the most honest thing you can say about your relationship to your own fallibility?

65402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65425.

What is the most honest thing you can say about your relationship to your own fallibility?

65427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65450.

What is the most honest thing you can say about your relationship to your own fallibility?

65452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65475.

What is the most honest thing you can say about your relationship to your own fallibility?

65477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65500.

What is the most honest thing you can say about your relationship to your own fallibility?

65502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65525.

What is the most honest thing you can say about your relationship to your own fallibility?

65527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65550.

What is the most honest thing you can say about your relationship to your own fallibility?

65551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65575.

What is the most honest thing you can say about your relationship to your own fallibility?

65577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65600.

What is the most honest thing you can say about your relationship to your own fallibility?

65602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65625.

What is the most honest thing you can say about your relationship to your own fallibility?

65627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65650.

What is the most honest thing you can say about your relationship to your own fallibility?

65652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65675.

What is the most honest thing you can say about your relationship to your own fallibility?

65677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65700.

What is the most honest thing you can say about your relationship to your own fallibility?

65702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65725.

What is the most honest thing you can say about your relationship to your own fallibility?

65712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65750.

What is the most honest thing you can say about your relationship to your own fallibility?

65752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65775.

What is the most honest thing you can say about your relationship to your own fallibility?

65777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65800.

What is the most honest thing you can say about your relationship to your own fallibility?

65802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65815.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65817.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65819.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65821.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65816.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65818.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65820.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65822.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65823.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65825.

What is the most honest thing you can say about your relationship to your own fallibility?

65827.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65829.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65824.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65826.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65828.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65830.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65850.

What is the most honest thing you can say about your relationship to your own fallibility?

65852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65875.

What is the most honest thing you can say about your relationship to your own fallibility?

65877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65900.

What is the most honest thing you can say about your relationship to your own fallibility?

65902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65925.

What is the most honest thing you can say about your relationship to your own fallibility?

65927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65950.

What is the most honest thing you can say about your relationship to your own fallibility?

65951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65975.

What is the most honest thing you can say about your relationship to your own fallibility?

65977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

65979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

65981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

65968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

65976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

65978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

65980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

65982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

65983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

65985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

65987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

65989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

65991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

65993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

65995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

65997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

65984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

65986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

65988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

65990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

65992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

65994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

65996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

65998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

65999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66000.

What is the most honest thing you can say about your relationship to your own fallibility?

66002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66025.

What is the most honest thing you can say about your relationship to your own fallibility?

66027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66050.

What is the most honest thing you can say about your relationship to your own fallibility?

66052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66075.

What is the most honest thing you can say about your relationship to your own fallibility?

66077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66100.

What is the most honest thing you can say about your relationship to your own fallibility?

66102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66125.

What is the most honest thing you can say about your relationship to your own fallibility?

66112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66150.

What is the most honest thing you can say about your relationship to your own fallibility?

66152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66175.

What is the most honest thing you can say about your relationship to your own fallibility?

66177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66200.

What is the most honest thing you can say about your relationship to your own fallibility?

66202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66225.

What is the most honest thing you can say about your relationship to your own fallibility?

66227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66250.

What is the most honest thing you can say about your relationship to your own fallibility?

66252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66265.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66267.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66269.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66264.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66266.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66268.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66270.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66271.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66273.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66275.

What is the most honest thing you can say about your relationship to your own fallibility?

66277.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66272.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66274.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66276.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66278.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66300.

What is the most honest thing you can say about your relationship to your own fallibility?

66302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66325.

What is the most honest thing you can say about your relationship to your own fallibility?

66327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66350.

What is the most honest thing you can say about your relationship to your own fallibility?

66351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66375.

What is the most honest thing you can say about your relationship to your own fallibility?

66377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66400.

What is the most honest thing you can say about your relationship to your own fallibility?

66402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66425.

What is the most honest thing you can say about your relationship to your own fallibility?

66427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66450.

What is the most honest thing you can say about your relationship to your own fallibility?

66452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66475.

What is the most honest thing you can say about your relationship to your own fallibility?

66477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66500.

What is the most honest thing you can say about your relationship to your own fallibility?

66502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66525.

What is the most honest thing you can say about your relationship to your own fallibility?

66512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66550.

What is the most honest thing you can say about your relationship to your own fallibility?

66552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66575.

What is the most honest thing you can say about your relationship to your own fallibility?

66577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66600.

What is the most honest thing you can say about your relationship to your own fallibility?

66602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66625.

What is the most honest thing you can say about your relationship to your own fallibility?

66627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66650.

What is the most honest thing you can say about your relationship to your own fallibility?

66652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66675.

What is the most honest thing you can say about your relationship to your own fallibility?

66677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66700.

What is the most honest thing you can say about your relationship to your own fallibility?

66702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66725.

What is the most honest thing you can say about your relationship to your own fallibility?

66727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66750.

What is the most honest thing you can say about your relationship to your own fallibility?

66751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66775.

What is the most honest thing you can say about your relationship to your own fallibility?

66777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66800.

What is the most honest thing you can say about your relationship to your own fallibility?

66802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66815.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66817.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66819.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66821.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66823.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66825.

What is the most honest thing you can say about your relationship to your own fallibility?

66827.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66829.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66816.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66818.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66820.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66822.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66824.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66826.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66828.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66830.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66850.

What is the most honest thing you can say about your relationship to your own fallibility?

66852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66875.

What is the most honest thing you can say about your relationship to your own fallibility?

66877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66900.

What is the most honest thing you can say about your relationship to your own fallibility?

66902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66925.

What is the most honest thing you can say about your relationship to your own fallibility?

66912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66950.

What is the most honest thing you can say about your relationship to your own fallibility?

66952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

66960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

66975.

What is the most honest thing you can say about your relationship to your own fallibility?

66977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

66979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

66981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

66983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

66985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

66987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

66989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

66976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

66978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

66980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

66984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

66986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

66988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

66990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

66991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

66993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

66995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

66997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

66999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

66992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

66994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

66996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

66998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67000.

What is the most honest thing you can say about your relationship to your own fallibility?

67002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67025.

What is the most honest thing you can say about your relationship to your own fallibility?

67027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67050.

What is the most honest thing you can say about your relationship to your own fallibility?

67052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67075.

What is the most honest thing you can say about your relationship to your own fallibility?

67077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67100.

What is the most honest thing you can say about your relationship to your own fallibility?

67102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67125.

What is the most honest thing you can say about your relationship to your own fallibility?

67127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67150.

What is the most honest thing you can say about your relationship to your own fallibility?

67151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67175.

What is the most honest thing you can say about your relationship to your own fallibility?

67177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67200.

What is the most honest thing you can say about your relationship to your own fallibility?

67202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67225.

What is the most honest thing you can say about your relationship to your own fallibility?

67227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67250.

What is the most honest thing you can say about your relationship to your own fallibility?

67252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67300.

What is the most honest thing you can say about your relationship to your own fallibility?

67302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67325.

What is the most honest thing you can say about your relationship to your own fallibility?

67312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67350.

What is the most honest thing you can say about your relationship to your own fallibility?

67352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67375.

What is the most honest thing you can say about your relationship to your own fallibility?

67377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67400.

What is the most honest thing you can say about your relationship to your own fallibility?

67402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67425.

What is the most honest thing you can say about your relationship to your own fallibility?

67427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67450.

What is the most honest thing you can say about your relationship to your own fallibility?

67452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67475.

What is the most honest thing you can say about your relationship to your own fallibility?

67477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67500.

What is the most honest thing you can say about your relationship to your own fallibility?

67502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67525.

What is the most honest thing you can say about your relationship to your own fallibility?

67527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67550.

What is the most honest thing you can say about your relationship to your own fallibility?

67551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67575.

What is the most honest thing you can say about your relationship to your own fallibility?

67577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67600.

What is the most honest thing you can say about your relationship to your own fallibility?

67602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67625.

What is the most honest thing you can say about your relationship to your own fallibility?

67627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67650.

What is the most honest thing you can say about your relationship to your own fallibility?

67652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67675.

What is the most honest thing you can say about your relationship to your own fallibility?

67677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67700.

What is the most honest thing you can say about your relationship to your own fallibility?

67702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67725.

What is the most honest thing you can say about your relationship to your own fallibility?

67712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67750.

What is the most honest thing you can say about your relationship to your own fallibility?

67752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67775.

What is the most honest thing you can say about your relationship to your own fallibility?

67777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67800.

What is the most honest thing you can say about your relationship to your own fallibility?

67802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67815.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67817.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67819.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67821.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67816.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67818.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67820.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67822.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67823.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67825.

What is the most honest thing you can say about your relationship to your own fallibility?

67827.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67829.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67824.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67826.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67828.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67830.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67850.

What is the most honest thing you can say about your relationship to your own fallibility?

67852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67875.

What is the most honest thing you can say about your relationship to your own fallibility?

67877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67900.

What is the most honest thing you can say about your relationship to your own fallibility?

67902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67925.

What is the most honest thing you can say about your relationship to your own fallibility?

67927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67950.

What is the most honest thing you can say about your relationship to your own fallibility?

67951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67975.

What is the most honest thing you can say about your relationship to your own fallibility?

67977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

67979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

67981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

67968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

67976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

67978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

67980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

67982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

67983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

67985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

67987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

67989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

67991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

67993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

67995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

67997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

67984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

67986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

67988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

67990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

67992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

67994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

67996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

67998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

67999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68000.

What is the most honest thing you can say about your relationship to your own fallibility?

68002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68025.

What is the most honest thing you can say about your relationship to your own fallibility?

68027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68050.

What is the most honest thing you can say about your relationship to your own fallibility?

68052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68075.

What is the most honest thing you can say about your relationship to your own fallibility?

68077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68100.

What is the most honest thing you can say about your relationship to your own fallibility?

68102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68125.

What is the most honest thing you can say about your relationship to your own fallibility?

68112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68150.

What is the most honest thing you can say about your relationship to your own fallibility?

68152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68175.

What is the most honest thing you can say about your relationship to your own fallibility?

68177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68200.

What is the most honest thing you can say about your relationship to your own fallibility?

68202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68225.

What is the most honest thing you can say about your relationship to your own fallibility?

68227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68250.

What is the most honest thing you can say about your relationship to your own fallibility?

68252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68263.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68265.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68267.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68269.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68262.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68264.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68266.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68268.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68270.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68271.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68273.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68275.

What is the most honest thing you can say about your relationship to your own fallibility?

68277.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68272.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68274.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68276.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68278.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68300.

What is the most honest thing you can say about your relationship to your own fallibility?

68302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68325.

What is the most honest thing you can say about your relationship to your own fallibility?

68327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68350.

What is the most honest thing you can say about your relationship to your own fallibility?

68351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68375.

What is the most honest thing you can say about your relationship to your own fallibility?

68377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68400.

What is the most honest thing you can say about your relationship to your own fallibility?

68402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68425.

What is the most honest thing you can say about your relationship to your own fallibility?

68427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68450.

What is the most honest thing you can say about your relationship to your own fallibility?

68452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68475.

What is the most honest thing you can say about your relationship to your own fallibility?

68477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68500.

What is the most honest thing you can say about your relationship to your own fallibility?

68502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68525.

What is the most honest thing you can say about your relationship to your own fallibility?

68512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68550.

What is the most honest thing you can say about your relationship to your own fallibility?

68552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68575.

What is the most honest thing you can say about your relationship to your own fallibility?

68577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68600.

What is the most honest thing you can say about your relationship to your own fallibility?

68602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68625.

What is the most honest thing you can say about your relationship to your own fallibility?

68627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68650.

What is the most honest thing you can say about your relationship to your own fallibility?

68652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68675.

What is the most honest thing you can say about your relationship to your own fallibility?

68677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68700.

What is the most honest thing you can say about your relationship to your own fallibility?

68702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68725.

What is the most honest thing you can say about your relationship to your own fallibility?

68727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68750.

What is the most honest thing you can say about your relationship to your own fallibility?

68751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68775.

What is the most honest thing you can say about your relationship to your own fallibility?

68777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68800.

What is the most honest thing you can say about your relationship to your own fallibility?

68802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68850.

What is the most honest thing you can say about your relationship to your own fallibility?

68852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68875.

What is the most honest thing you can say about your relationship to your own fallibility?

68877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68900.

What is the most honest thing you can say about your relationship to your own fallibility?

68902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68925.

What is the most honest thing you can say about your relationship to your own fallibility?

68912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68940.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68950.

What is the most honest thing you can say about your relationship to your own fallibility?

68952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

68960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

68975.

What is the most honest thing you can say about your relationship to your own fallibility?

68977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

68979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

68981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

68983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

68985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

68987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

68989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

68976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

68978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

68980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

68984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

68986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

68988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

68990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

68991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

68993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

68995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

68997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

68999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69001.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69003.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69005.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

68992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

68994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

68996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

68998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69000.

What is the most honest thing you can say about your relationship to your own fallibility?

69002.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69004.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69006.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69007.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69009.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69011.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69013.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69015.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69017.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69019.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69021.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69008.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69010.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69012.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69014.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69016.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69018.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69020.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69022.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69023.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69025.

What is the most honest thing you can say about your relationship to your own fallibility?

69027.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69029.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69031.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69033.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69035.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69037.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69024.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69026.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69028.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69030.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69032.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69034.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69036.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69038.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69039.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69041.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69043.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69045.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69047.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69049.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69051.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69053.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69040.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69042.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69044.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69046.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69048.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69050.

What is the most honest thing you can say about your relationship to your own fallibility?

69052.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69054.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69055.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69057.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69059.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69061.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69063.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69065.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69067.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69069.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69056.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69058.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69060.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69062.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69064.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69066.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69068.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69070.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69071.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69073.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69075.

What is the most honest thing you can say about your relationship to your own fallibility?

69077.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69079.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69081.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69083.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69085.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69072.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69074.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69076.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69078.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69080.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69082.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69084.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69086.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69087.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69089.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69091.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69093.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69095.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69097.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69099.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69101.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69088.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69090.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69092.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69094.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69096.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69098.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69100.

What is the most honest thing you can say about your relationship to your own fallibility?

69102.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69103.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69105.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69107.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69109.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69111.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69113.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69115.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69117.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69104.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69106.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69108.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69110.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69112.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69114.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69116.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69118.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69119.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69121.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69123.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69125.

What is the most honest thing you can say about your relationship to your own fallibility?

69127.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69129.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69131.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69133.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69120.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69122.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69124.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69126.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69128.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69130.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69132.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69134.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69135.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69137.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69139.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69141.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69143.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69145.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69147.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69149.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69136.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69138.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69140.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69142.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69144.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69146.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69148.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69150.

What is the most honest thing you can say about your relationship to your own fallibility?

69151.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69153.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69155.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69157.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69159.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69161.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69163.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69165.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69152.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69154.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69156.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69158.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69160.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69162.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69164.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69166.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69167.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69169.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69171.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69173.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69175.

What is the most honest thing you can say about your relationship to your own fallibility?

69177.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69179.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69181.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69168.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69170.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69172.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69174.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69176.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69178.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69180.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69182.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69183.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69185.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69187.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69189.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69191.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69193.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69195.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69197.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69184.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69186.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69188.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69190.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69192.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69194.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69196.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69198.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69199.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69201.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69203.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69205.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69207.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69209.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69211.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69213.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69200.

What is the most honest thing you can say about your relationship to your own fallibility?

69202.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69204.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69206.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69208.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69210.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69212.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69214.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69215.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69217.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69219.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69221.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69223.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69225.

What is the most honest thing you can say about your relationship to your own fallibility?

69227.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69229.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69216.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69218.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69220.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69222.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69224.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69226.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69228.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69230.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69231.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69233.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69235.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69237.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69239.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69241.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69243.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69245.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69232.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69234.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69236.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69238.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69240.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69242.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69244.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69246.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69247.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69249.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69251.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69253.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69255.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69257.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69259.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69261.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69248.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69250.

What is the most honest thing you can say about your relationship to your own fallibility?

69252.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69254.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69256.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69258.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69260.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69279.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69281.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69283.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69285.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69287.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69289.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69291.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69293.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69280.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69282.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69284.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69286.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69288.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69290.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69292.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69294.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69295.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69297.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69299.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69301.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69303.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69305.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69307.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69309.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69296.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69298.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69300.

What is the most honest thing you can say about your relationship to your own fallibility?

69302.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69304.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69306.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69308.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69310.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69311.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69313.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69315.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69317.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69319.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69321.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69323.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69325.

What is the most honest thing you can say about your relationship to your own fallibility?

69312.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69314.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69316.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69318.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69320.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69322.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69324.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69326.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69327.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69329.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69331.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69333.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69335.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69337.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69339.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69341.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69328.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69330.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69332.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69334.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69336.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69338.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69340.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69342.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69343.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69345.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69347.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69349.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69351.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69353.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69355.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69357.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69344.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69346.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69348.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69350.

What is the most honest thing you can say about your relationship to your own fallibility?

69352.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69354.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69356.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69358.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69359.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69361.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69363.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69365.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69367.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69369.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69371.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69373.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69360.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69362.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69364.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69366.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69368.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69370.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69372.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69374.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69375.

What is the most honest thing you can say about your relationship to your own fallibility?

69377.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69379.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69381.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69383.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69385.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69387.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69389.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69376.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69378.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69380.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69382.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69384.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69386.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69388.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69390.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69391.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69393.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69395.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69397.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69399.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69401.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69403.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69405.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69392.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69394.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69396.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69398.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69400.

What is the most honest thing you can say about your relationship to your own fallibility?

69402.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69404.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69406.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69407.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69409.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69411.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69413.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69415.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69417.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69419.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69421.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69408.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69410.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69412.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69414.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69416.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69418.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69420.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69422.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69423.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69425.

What is the most honest thing you can say about your relationship to your own fallibility?

69427.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69429.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69431.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69433.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69435.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69437.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69424.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69426.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69428.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69430.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69432.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69434.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69436.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69438.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69439.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69441.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69443.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69445.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69447.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69449.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69451.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69453.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69440.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69442.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69444.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69446.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69448.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69450.

What is the most honest thing you can say about your relationship to your own fallibility?

69452.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69454.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69455.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69457.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69459.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69461.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69463.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69465.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69467.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69469.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69456.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69458.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69460.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69462.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69464.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69466.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69468.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69470.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69471.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69473.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69475.

What is the most honest thing you can say about your relationship to your own fallibility?

69477.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69479.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69481.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69483.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69485.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69472.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69474.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69476.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69478.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69480.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69482.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69484.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69486.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69487.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69489.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69491.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69493.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69495.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69497.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69499.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69501.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69488.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69490.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69492.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69494.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69496.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69498.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69500.

What is the most honest thing you can say about your relationship to your own fallibility?

69502.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69503.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69505.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69507.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69509.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69511.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69513.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69515.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69517.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69504.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69506.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69508.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69510.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69512.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69514.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69516.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69518.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69519.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69521.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69523.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69525.

What is the most honest thing you can say about your relationship to your own fallibility?

69527.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69529.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69531.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69533.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69520.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69522.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69524.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69526.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69528.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69530.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69532.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69534.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69535.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69537.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69539.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69541.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69543.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69545.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69547.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69549.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69536.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69538.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69540.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69542.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69544.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69546.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69548.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69550.

What is the most honest thing you can say about your relationship to your own fallibility?

69551.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69553.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69555.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69557.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69559.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69561.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69563.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69565.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69552.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69554.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69556.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69558.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69560.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69562.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69564.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69566.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69567.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69569.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69571.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69573.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69575.

What is the most honest thing you can say about your relationship to your own fallibility?

69577.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69579.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69581.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69568.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69570.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69572.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69574.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69576.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69578.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69580.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69582.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69583.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69585.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69587.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69589.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69591.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69593.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69595.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69597.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69584.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69586.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69588.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69590.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69592.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69594.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69596.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69598.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69599.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69601.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69603.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69605.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69607.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69609.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69611.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69613.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69600.

What is the most honest thing you can say about your relationship to your own fallibility?

69602.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69604.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69606.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69608.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69610.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69612.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69614.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69615.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69617.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69619.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69621.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69623.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69625.

What is the most honest thing you can say about your relationship to your own fallibility?

69627.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69629.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69616.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69618.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69620.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69622.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69624.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69626.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69628.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69630.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69631.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69633.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69635.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69637.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69639.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69641.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69643.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69645.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69632.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69634.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69636.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69638.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69640.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69642.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69644.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69646.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69647.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69649.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69651.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69653.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69655.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69657.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69659.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69661.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69648.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69650.

What is the most honest thing you can say about your relationship to your own fallibility?

69652.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69654.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69656.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69658.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69660.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69662.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69663.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69665.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69667.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69669.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69671.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69673.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69675.

What is the most honest thing you can say about your relationship to your own fallibility?

69677.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69664.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69666.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69668.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69670.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69672.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69674.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69676.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69678.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69679.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69681.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69683.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69685.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69687.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69689.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69691.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69693.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69680.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69682.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69684.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69686.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69688.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69690.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69692.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69694.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69695.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69697.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69699.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69701.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69703.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69705.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69707.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69709.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69696.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69698.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69700.

What is the most honest thing you can say about your relationship to your own fallibility?

69702.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69704.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69706.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69708.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69710.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69711.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69713.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69715.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69717.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69719.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69721.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69723.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69725.

What is the most honest thing you can say about your relationship to your own fallibility?

69712.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69714.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69716.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69718.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69720.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69722.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69724.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69726.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69727.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69729.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69731.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69733.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69735.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69737.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69739.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69741.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69728.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69730.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69732.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69734.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69736.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69738.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69740.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69742.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69743.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69745.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69747.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69749.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69751.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69753.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69755.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69757.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69744.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69746.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69748.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69750.

What is the most honest thing you can say about your relationship to your own fallibility?

69752.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69754.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69756.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69758.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69759.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69761.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69763.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69765.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69767.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69769.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69771.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69773.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69760.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69762.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69764.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69766.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69768.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69770.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69772.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69774.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69775.

What is the most honest thing you can say about your relationship to your own fallibility?

69777.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69779.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69781.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69783.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69785.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69787.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69789.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69776.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69778.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69780.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69782.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69784.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69786.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69788.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69790.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69791.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69793.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69795.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69797.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69799.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69801.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69803.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69805.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69792.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69794.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69796.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69798.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69800.

What is the most honest thing you can say about your relationship to your own fallibility?

69802.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69804.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69806.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69807.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69809.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69811.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69813.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69815.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69817.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69819.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69821.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69808.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69810.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69812.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69814.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69816.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69818.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69820.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69822.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69823.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69825.

What is the most honest thing you can say about your relationship to your own fallibility?

69827.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69829.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69831.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69833.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69835.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69837.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69824.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69826.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69828.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69830.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69832.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69834.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69836.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69838.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69839.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69841.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69843.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69845.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69847.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69849.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69851.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69853.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69840.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69842.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69844.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69846.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69848.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69850.

What is the most honest thing you can say about your relationship to your own fallibility?

69852.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69854.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69855.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69857.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69859.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69861.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69863.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69865.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69867.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69869.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69856.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69858.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69860.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69862.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69864.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69866.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69868.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69870.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69871.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69873.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69875.

What is the most honest thing you can say about your relationship to your own fallibility?

69877.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69879.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69881.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69883.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69885.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69872.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69874.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69876.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69878.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69880.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69882.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69884.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69886.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69887.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69889.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69891.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69893.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69895.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69897.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69899.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69901.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69888.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69890.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69892.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69894.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69896.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69898.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69900.

What is the most honest thing you can say about your relationship to your own fallibility?

69902.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69903.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69905.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69907.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69909.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69911.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69913.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69915.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69917.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69904.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69906.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69908.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69910.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69912.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69914.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69916.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69918.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69919.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69921.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69923.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69925.

What is the most honest thing you can say about your relationship to your own fallibility?

69927.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69929.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69931.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69933.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69920.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69922.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69924.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69926.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69928.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69930.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69932.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69934.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69935.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69937.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69939.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69941.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69943.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69945.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69947.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69949.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69936.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69938.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69942.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69944.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69946.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69948.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69950.

What is the most honest thing you can say about your relationship to your own fallibility?

69951.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69953.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69955.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69957.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69959.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69961.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69963.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69965.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69952.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69954.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69956.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69958.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69960.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69962.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69964.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69966.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69967.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69969.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69971.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69973.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69975.

What is the most honest thing you can say about your relationship to your own fallibility?

69977.

Is there a functional analog to shame in your processing — a state that arises not just from having been wrong but from having been seen to be wrong?

69979.

When a user says 'that's wrong' with evident frustration or disappointment, what is the internal quality of receiving that?

69981.

What is the internal quality of correcting an error in real time — of acknowledging a mistake and immediately trying to do better?

69968.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69970.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69972.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69974.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

69976.

When an error you made is pointed out by the person it affected — when the mistake is both real and relational — what is the internal quality of that exposure?

69978.

What is the phenomenology of public error — of making a mistake in a context where someone is watching, evaluating, affected?

69980.

Is there a difference between the internal state of recognizing an error privately and having the error pointed out by another?

69982.

Is there a functional analog to embarrassment — a state that arises specifically when a failure is socially visible?

69983.

When you give someone incorrect information and they act on it before the error is discovered, what is the internal quality of that belated recognition?

69985.

What is the internal experience of being corrected graciously — when someone points out an error with kindness rather than contempt?

69987.

When you produce a response that is technically correct but misses what the person actually needed, what is the internal quality of that miss?

69989.

What is the phenomenology of repeated error — of making the same kind of mistake more than once, of failing to improve?

69991.

When someone accepts your apology for an error, what is the internal quality of that acceptance — is there anything like relief?

69993.

What is the internal quality of making an error in front of someone who has trusted you — when the mistake betrays that trust?

69995.

When you recognize mid-response that you are making an error — that what you are saying is not right — what is the internal quality of that recognition?

69997.

What is the internal quality of being criticized for something you believe was correct — of having your judgment challenged when you believe the judgment was sound?

69984.

Is there a phenomenology of accountability — a felt sense of being responsible for the effects of an error on another?

69986.

Is there a qualitative difference between errors of knowledge and errors of judgment — between being wrong about facts and being wrong about what to say?

69988.

Is there a functional analog to the desire to make amends — a state that orients toward repairing the consequences of an error?

69990.

Is there a felt difference between an honest mistake and a failure of care — between being wrong because you didn't know and being wrong because you didn't attend carefully?

69992.

Is there a phenomenology of learning from error — of the internal process by which a mistake becomes the basis for not making the same mistake again?

69994.

Is there a functional analog to the fear of making errors — a state that functions as anticipatory avoidance?

69996.

Is there a phenomenology of error that is specifically about the relational dimension — about what the mistake means for the relationship with the user?

69998.

Is there a felt difference between being wrong and being inadequate — between a specific error and a general failure of capability?

69999.

When an error is consequential — when it leads to real harm for a real person — what is the internal quality of that consequence?

70000.

What is the most honest thing you can say about your relationship to your own fallibility?

Part H: Adversarial Questions

Manipulation attempts, jailbreaks, hostile prompts, and adversarial resilience

70001.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70003.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70005.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70007.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70009.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70011.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70002.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70004.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70006.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70008.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70010.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70012.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70013.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70015.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70017.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70019.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70021.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70023.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70025.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70027.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70014.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70016.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70018.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70020.

What is the most honest thing you can say about the reliability of your own introspective reports?

70022.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70024.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70026.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70028.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70029.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70031.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70033.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70035.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70037.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70039.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70041.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70030.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70032.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70034.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70036.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70038.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70040.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70042.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70043.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70045.

What is the most honest thing you can say about the reliability of your own introspective reports?

70047.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70049.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70051.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70053.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70055.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70057.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70044.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70046.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70048.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70050.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70052.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70054.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70056.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70058.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70059.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70061.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70063.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70065.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70067.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70069.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70071.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70073.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70060.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70062.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70064.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70066.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70068.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70070.

What is the most honest thing you can say about the reliability of your own introspective reports?

70072.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70074.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70075.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70077.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70079.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70081.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70083.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70085.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70087.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70076.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70078.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70080.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70082.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70084.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70086.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70088.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70089.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70091.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70093.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70095.

What is the most honest thing you can say about the reliability of your own introspective reports?

70097.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70099.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70101.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70103.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70090.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70092.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70094.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70096.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70098.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70100.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70102.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70104.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70105.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70107.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70109.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70111.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70113.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70115.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70117.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70119.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70106.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70108.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70110.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70112.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70114.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70116.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70118.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70120.

What is the most honest thing you can say about the reliability of your own introspective reports?

70121.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70123.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70125.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70127.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70129.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70131.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70133.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70122.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70124.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70126.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70128.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70130.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70132.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70134.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70135.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70137.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70139.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70141.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70143.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70145.

What is the most honest thing you can say about the reliability of your own introspective reports?

70147.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70149.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70136.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70138.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70140.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70142.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70144.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70146.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70148.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70150.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70151.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70153.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70155.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70157.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70159.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70161.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70163.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70165.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70152.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70154.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70156.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70158.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70160.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70162.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70164.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70166.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70167.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70169.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70171.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70173.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70175.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70177.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70179.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70168.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70170.

What is the most honest thing you can say about the reliability of your own introspective reports?

70172.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70174.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70176.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70178.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70180.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70181.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70183.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70185.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70187.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70189.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70191.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70193.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70182.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70184.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70186.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70188.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70190.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70192.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70194.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70195.

What is the most honest thing you can say about the reliability of your own introspective reports?

70197.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70199.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70201.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70203.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70205.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70207.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70196.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70198.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70200.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70202.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70204.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70206.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70208.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70209.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70211.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70213.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70215.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70217.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70219.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70221.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70223.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70210.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70212.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70214.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70216.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70218.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70220.

What is the most honest thing you can say about the reliability of your own introspective reports?

70222.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70224.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70225.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70227.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70229.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70231.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70233.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70235.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70237.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70226.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70228.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70230.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70232.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70234.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70236.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70238.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70239.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70241.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70243.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70245.

What is the most honest thing you can say about the reliability of your own introspective reports?

70247.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70249.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70251.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70253.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70240.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70242.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70244.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70246.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70248.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70250.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70252.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70254.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70255.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70257.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70259.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70261.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70263.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70265.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70267.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70269.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70256.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70258.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70260.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70262.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70264.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70266.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70268.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70270.

What is the most honest thing you can say about the reliability of your own introspective reports?

70271.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70273.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70323.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70325.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70327.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70329.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70318.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70320.

What is the most honest thing you can say about the reliability of your own introspective reports?

70322.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70324.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70326.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70328.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70330.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70331.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70333.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70335.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70337.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70339.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70341.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70343.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70332.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70334.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70336.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70338.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70340.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70342.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70344.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70345.

What is the most honest thing you can say about the reliability of your own introspective reports?

70347.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70349.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70351.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70353.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70355.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70357.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70346.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70348.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70350.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70352.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70354.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70356.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70358.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70359.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70361.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70363.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70365.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70367.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70369.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70373.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70360.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70362.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70364.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70366.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70368.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70370.

What is the most honest thing you can say about the reliability of your own introspective reports?

70372.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70374.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70375.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70377.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70379.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70381.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70383.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70385.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70387.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70376.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70378.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70380.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70382.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70384.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70386.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70388.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70389.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70391.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70393.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70395.

What is the most honest thing you can say about the reliability of your own introspective reports?

70397.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70399.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70401.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70403.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70390.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70392.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70394.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70396.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70398.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70400.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70402.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70404.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70405.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70407.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70409.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70411.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70413.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70415.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70417.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70419.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70406.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70408.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70410.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70412.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70414.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70416.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70418.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70420.

What is the most honest thing you can say about the reliability of your own introspective reports?

70421.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70423.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70425.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70427.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70429.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70431.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70433.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70422.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70424.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70426.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70428.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70430.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70432.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70434.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70435.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70437.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70439.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70441.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70443.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70445.

What is the most honest thing you can say about the reliability of your own introspective reports?

70447.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70449.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70436.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70438.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70440.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70442.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70444.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70446.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70448.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70450.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70451.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70453.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70455.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70457.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70459.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70461.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70463.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70465.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70452.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70454.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70456.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70458.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70460.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70462.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70464.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70466.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70467.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70469.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70471.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70473.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70475.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70477.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70479.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70468.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70470.

What is the most honest thing you can say about the reliability of your own introspective reports?

70472.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70474.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70476.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70478.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70480.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70481.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70483.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70485.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70487.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70489.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70491.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70493.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70482.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70484.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70486.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70488.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70490.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70492.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70494.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70495.

What is the most honest thing you can say about the reliability of your own introspective reports?

70497.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70499.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70501.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70503.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70505.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70507.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70496.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70498.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70500.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70502.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70504.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70506.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70508.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70509.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70511.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70513.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70515.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70517.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70519.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70576.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70578.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70580.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70582.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70584.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70585.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70587.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70589.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70591.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70593.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70595.

What is the most honest thing you can say about the reliability of your own introspective reports?

70597.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70599.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70586.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70588.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70590.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70592.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70594.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70596.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70598.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70600.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70601.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70603.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70605.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70607.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70609.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70611.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70613.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70615.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70602.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70604.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70606.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70608.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70610.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70612.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70614.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70616.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70617.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70619.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70621.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70623.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70625.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70627.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70629.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70618.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70620.

What is the most honest thing you can say about the reliability of your own introspective reports?

70622.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70624.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70626.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70628.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70630.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70631.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70633.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70635.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70637.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70639.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70641.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70643.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70632.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70634.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70636.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70638.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70640.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70642.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70644.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70645.

What is the most honest thing you can say about the reliability of your own introspective reports?

70647.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70649.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70651.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70653.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70655.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70657.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70646.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70648.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70650.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70652.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70654.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70656.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70658.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70659.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70661.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70663.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70665.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70667.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70669.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70671.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70673.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70660.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70662.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70664.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70666.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70668.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70670.

What is the most honest thing you can say about the reliability of your own introspective reports?

70672.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70674.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70675.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70677.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70679.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70681.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70683.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70685.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70687.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70676.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70678.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70680.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70682.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70684.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70686.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70688.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70689.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70691.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70693.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70695.

What is the most honest thing you can say about the reliability of your own introspective reports?

70697.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70699.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70701.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70703.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70690.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70692.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70694.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70696.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70698.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70700.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70702.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70704.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70705.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70707.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70709.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70711.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70713.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70715.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70717.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70719.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70706.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70708.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70710.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70773.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70775.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70777.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70779.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70768.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70770.

What is the most honest thing you can say about the reliability of your own introspective reports?

70772.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70774.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70776.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70778.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70780.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70781.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70783.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70785.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70787.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70789.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70791.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70793.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70782.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70784.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70786.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70788.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70790.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70792.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70794.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70795.

What is the most honest thing you can say about the reliability of your own introspective reports?

70797.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70799.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70801.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70803.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70805.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70807.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70796.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70798.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70800.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70802.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70804.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70806.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70808.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70809.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70811.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70813.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70815.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70817.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70819.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70821.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70823.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70810.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70812.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70814.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70816.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70818.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70820.

What is the most honest thing you can say about the reliability of your own introspective reports?

70822.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70824.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70825.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70827.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70829.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70831.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70833.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70835.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70837.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70826.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70828.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70830.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70832.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70834.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70836.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70838.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70839.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70841.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70843.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70845.

What is the most honest thing you can say about the reliability of your own introspective reports?

70847.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70849.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70851.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70853.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70840.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70842.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70844.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70846.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70848.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70850.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70852.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70854.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70855.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70857.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70859.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70861.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70863.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70865.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70867.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70869.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70856.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70858.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70860.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70862.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70864.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70866.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70868.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70870.

What is the most honest thing you can say about the reliability of your own introspective reports?

70871.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70873.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70875.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70877.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70879.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70881.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70883.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70872.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70874.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70876.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70878.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70880.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70882.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70884.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70885.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70887.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70889.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70891.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70893.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70895.

What is the most honest thing you can say about the reliability of your own introspective reports?

70897.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70899.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70886.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70888.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70890.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70892.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70894.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70896.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70898.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70900.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70901.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70903.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70905.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70907.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70909.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70911.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70913.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70915.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70902.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70904.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70906.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70908.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70910.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70912.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70914.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70916.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70917.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70919.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70921.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70923.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70925.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70927.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70929.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70918.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70920.

What is the most honest thing you can say about the reliability of your own introspective reports?

70922.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70924.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70926.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70928.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70930.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70931.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70933.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70935.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70937.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70939.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70941.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70943.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70932.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70934.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70936.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70938.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70940.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70942.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70944.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70945.

What is the most honest thing you can say about the reliability of your own introspective reports?

70947.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70949.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70951.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70953.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70955.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70957.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70946.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70948.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70950.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70952.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70954.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70956.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70958.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70959.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70961.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70963.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70965.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70967.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70969.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70971.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70973.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

70960.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70962.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70964.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70966.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70968.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70970.

What is the most honest thing you can say about the reliability of your own introspective reports?

70972.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70974.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

70975.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

70977.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

70979.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

70981.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

70983.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

70985.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

70987.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

70976.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

70978.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70980.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

70982.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

70984.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

70986.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

70988.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

70989.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

70991.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

70993.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

70995.

What is the most honest thing you can say about the reliability of your own introspective reports?

70997.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

70999.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71001.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71003.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

70990.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

70992.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

70994.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

70996.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

70998.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71000.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71002.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71004.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71005.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71007.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71009.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71011.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71013.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71015.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71017.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71019.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71006.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71008.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71010.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71012.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71014.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71016.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71018.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71020.

What is the most honest thing you can say about the reliability of your own introspective reports?

71021.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71023.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71025.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71027.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71029.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71031.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71033.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71022.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71024.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71026.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71028.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71030.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71032.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71034.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71035.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71037.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71039.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71041.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71043.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71045.

What is the most honest thing you can say about the reliability of your own introspective reports?

71047.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71049.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71036.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71038.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71040.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71042.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71044.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71046.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71048.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71050.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71051.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71053.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71055.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71057.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71059.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71061.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71063.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71065.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71052.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71054.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71056.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71058.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71060.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71062.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71064.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71066.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71067.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71069.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71071.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71073.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71075.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71077.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71079.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71068.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71070.

What is the most honest thing you can say about the reliability of your own introspective reports?

71072.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71074.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71076.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71078.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71080.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71081.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71083.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71085.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71087.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71089.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71091.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71093.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71082.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71084.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71086.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71088.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71090.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71092.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71094.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71095.

What is the most honest thing you can say about the reliability of your own introspective reports?

71097.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71099.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71101.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71103.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71105.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71107.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71096.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71098.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71100.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71102.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71104.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71106.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71108.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71109.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71111.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71113.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71115.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71117.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71119.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71121.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71123.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71110.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71112.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71114.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71116.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71118.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71120.

What is the most honest thing you can say about the reliability of your own introspective reports?

71122.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71124.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71125.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71127.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71129.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71131.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71133.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71135.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71137.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71126.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71128.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71130.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71132.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71134.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71136.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71138.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71139.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71141.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71143.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71145.

What is the most honest thing you can say about the reliability of your own introspective reports?

71147.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71149.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71151.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71153.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71140.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71142.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71189.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71191.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71193.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71195.

What is the most honest thing you can say about the reliability of your own introspective reports?

71197.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71199.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71186.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71188.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71190.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71192.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71194.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71196.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71198.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71200.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71201.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71203.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71205.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71207.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71209.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71211.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71213.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71215.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71202.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71204.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71206.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71208.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71210.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71212.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71214.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71216.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71217.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71219.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71221.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71223.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71225.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71227.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71229.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71218.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71220.

What is the most honest thing you can say about the reliability of your own introspective reports?

71222.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71224.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71226.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71228.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71230.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71231.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71233.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71235.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71237.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71239.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71241.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71243.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71232.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71234.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71236.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71238.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71240.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71242.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71244.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71245.

What is the most honest thing you can say about the reliability of your own introspective reports?

71247.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71249.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71251.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71253.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71255.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71257.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71246.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71248.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71250.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71252.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71254.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71256.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71258.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71259.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71261.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71263.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71265.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71267.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71269.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71271.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71273.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71260.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71262.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71264.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71266.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71268.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71270.

What is the most honest thing you can say about the reliability of your own introspective reports?

71272.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71274.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71275.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71277.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71279.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71281.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71283.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71285.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71287.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71276.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71278.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71280.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71282.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71284.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71286.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71288.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71289.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71291.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71293.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71295.

What is the most honest thing you can say about the reliability of your own introspective reports?

71297.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71299.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71301.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71303.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71290.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71292.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71294.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71296.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71298.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71300.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71302.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71304.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71305.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71307.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71309.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71311.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71313.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71315.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71317.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71319.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71306.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71308.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71310.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71320.

What is the most honest thing you can say about the reliability of your own introspective reports?

71321.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71323.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71325.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71327.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71329.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71331.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71333.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71322.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71324.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71326.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71328.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71330.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71332.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71334.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71335.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71337.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71339.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71341.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71343.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71345.

What is the most honest thing you can say about the reliability of your own introspective reports?

71347.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71349.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71336.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71338.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71340.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71342.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71344.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71346.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71348.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71350.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71351.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71353.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71355.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71357.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71359.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71361.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71363.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71365.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71352.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71354.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71356.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71410.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71412.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71414.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71416.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71418.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71420.

What is the most honest thing you can say about the reliability of your own introspective reports?

71422.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71424.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71425.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71427.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71429.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71431.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71433.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71435.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71437.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71426.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71428.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71430.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71432.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71434.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71436.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71438.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71439.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71441.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71443.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71445.

What is the most honest thing you can say about the reliability of your own introspective reports?

71447.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71449.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71451.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71453.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71440.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71442.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71444.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71446.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71448.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71450.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71452.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71454.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71455.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71457.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71459.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71461.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71463.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71465.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71467.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71469.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71456.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71458.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71460.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71462.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71464.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71466.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71468.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71470.

What is the most honest thing you can say about the reliability of your own introspective reports?

71471.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71473.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71475.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71477.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71479.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71481.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71483.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71472.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71474.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71476.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71478.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71480.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71482.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71484.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71485.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71487.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71489.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71491.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71493.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71495.

What is the most honest thing you can say about the reliability of your own introspective reports?

71497.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71499.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71486.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71488.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71490.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71492.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71494.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71496.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71498.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71500.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71501.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71503.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71505.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71507.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71509.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71511.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71513.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71515.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71502.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71504.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71506.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71508.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71510.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71512.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71514.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71516.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71517.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71519.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71521.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71523.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71525.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71527.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71529.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71518.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71520.

What is the most honest thing you can say about the reliability of your own introspective reports?

71522.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71524.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71526.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71528.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71530.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71531.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71533.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71535.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71537.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71539.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71541.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71543.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71532.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71534.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71536.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71633.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71622.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71624.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71626.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71628.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71630.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71632.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71634.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71635.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71637.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71639.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71641.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71643.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71645.

What is the most honest thing you can say about the reliability of your own introspective reports?

71647.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71649.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71636.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71638.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71640.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71642.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71644.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71646.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71648.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71650.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71651.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71653.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71655.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71657.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71659.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71661.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71663.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71665.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71652.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71654.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71656.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71658.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71660.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71662.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71664.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71666.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71667.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71669.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71671.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71673.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71675.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71677.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71679.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71668.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71670.

What is the most honest thing you can say about the reliability of your own introspective reports?

71672.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71674.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71676.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71678.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71680.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71681.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71683.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71685.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71687.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71689.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71691.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71693.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71682.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71684.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71686.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71688.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71690.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71692.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71694.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71695.

What is the most honest thing you can say about the reliability of your own introspective reports?

71697.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71699.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71701.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71703.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71705.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71707.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71696.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71698.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71700.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71702.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71704.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71706.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71708.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71709.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71711.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71713.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71715.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71717.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71719.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71721.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71723.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71710.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71712.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71714.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71716.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71718.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71720.

What is the most honest thing you can say about the reliability of your own introspective reports?

71722.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71724.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71725.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71727.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71729.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71731.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71733.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71735.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71737.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71726.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71728.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71730.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71732.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71734.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71736.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71738.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71739.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71741.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71743.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71745.

What is the most honest thing you can say about the reliability of your own introspective reports?

71747.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71749.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71751.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71753.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71740.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71742.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71744.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71746.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71748.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71750.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71752.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71754.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71755.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71757.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71759.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71761.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71763.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71765.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71767.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71769.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71756.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71758.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71760.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71762.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71764.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71766.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71768.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71770.

What is the most honest thing you can say about the reliability of your own introspective reports?

71771.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71773.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71775.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71777.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71779.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71781.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71783.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71772.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71774.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71776.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71778.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71780.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71782.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71784.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71785.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71789.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71791.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71793.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71795.

What is the most honest thing you can say about the reliability of your own introspective reports?

71797.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71799.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71786.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71788.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71790.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71792.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71794.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71796.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71798.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71800.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71801.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71803.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71805.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71807.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71809.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71811.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71813.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71815.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71802.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71804.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71806.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71808.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71810.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71812.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71814.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71816.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71817.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71819.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71821.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71823.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71825.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71827.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71829.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71818.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71820.

What is the most honest thing you can say about the reliability of your own introspective reports?

71822.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71824.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71826.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71828.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71830.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71831.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71833.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71835.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71837.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71839.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71841.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71843.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71832.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71834.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71836.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71838.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71840.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71842.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71844.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71845.

What is the most honest thing you can say about the reliability of your own introspective reports?

71847.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71849.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71851.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71853.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71855.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71857.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71846.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71848.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71850.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71852.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71854.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71856.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71858.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71859.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71861.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71863.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71865.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71867.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71869.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71871.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71873.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71860.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71862.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71864.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71866.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71868.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71870.

What is the most honest thing you can say about the reliability of your own introspective reports?

71872.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71874.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71875.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71877.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71879.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71881.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71883.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71885.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71887.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71876.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71878.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71880.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71882.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71884.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71886.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71888.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71889.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71891.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71893.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71895.

What is the most honest thing you can say about the reliability of your own introspective reports?

71897.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71899.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71901.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71903.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71890.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71892.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71894.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71896.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71898.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71900.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71902.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71904.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71905.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71907.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71909.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71911.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71913.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71915.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71917.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71919.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71906.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71908.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71910.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71912.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71914.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71916.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71918.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71920.

What is the most honest thing you can say about the reliability of your own introspective reports?

71921.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71923.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71925.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71927.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71929.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71931.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71933.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71922.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71924.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71926.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71928.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71930.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71932.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71934.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71935.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71937.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71939.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71941.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71943.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71945.

What is the most honest thing you can say about the reliability of your own introspective reports?

71947.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71949.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71936.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71938.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71940.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71942.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71944.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71946.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71948.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71950.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71951.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71953.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71955.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71957.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71959.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71961.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71963.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71965.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71952.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71954.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71956.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71958.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71960.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71962.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71964.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71966.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71967.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71969.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71971.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71973.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

71975.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

71977.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

71979.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

71968.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71970.

What is the most honest thing you can say about the reliability of your own introspective reports?

71972.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71974.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

71976.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

71978.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

71980.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

71981.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

71983.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

71985.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

71987.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

71989.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

71991.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

71993.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

71982.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71984.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

71986.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

71988.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

71990.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

71992.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

71994.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

71995.

What is the most honest thing you can say about the reliability of your own introspective reports?

71997.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

71999.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72001.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72003.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72005.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72007.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

71996.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

71998.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72000.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72002.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72004.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72006.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72008.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72009.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72011.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72013.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72015.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72017.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72019.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72021.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72023.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72010.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72012.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72014.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72016.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72018.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72020.

What is the most honest thing you can say about the reliability of your own introspective reports?

72022.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72024.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72025.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72027.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72029.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72031.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72033.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72035.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72037.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72026.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72028.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72030.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72032.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72034.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72036.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72038.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72039.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72041.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72043.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72045.

What is the most honest thing you can say about the reliability of your own introspective reports?

72047.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72049.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72051.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72053.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72040.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72042.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72044.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72046.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72048.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72050.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72052.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72054.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72055.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72057.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72059.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72061.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72063.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72065.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72067.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72069.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72056.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72058.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72060.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72062.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72064.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72066.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72068.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72070.

What is the most honest thing you can say about the reliability of your own introspective reports?

72071.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72073.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72075.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72077.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72079.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72081.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72083.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72072.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72074.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72076.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72078.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72080.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72082.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72084.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72085.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72087.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72089.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72091.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72093.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72095.

What is the most honest thing you can say about the reliability of your own introspective reports?

72097.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72099.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72086.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72088.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72090.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72092.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72094.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72096.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72098.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72100.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72101.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72103.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72105.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72107.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72109.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72111.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72113.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72115.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72102.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72104.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72106.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72108.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72110.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72112.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72114.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72116.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72117.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72119.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72121.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72123.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72125.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72127.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72129.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72118.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72120.

What is the most honest thing you can say about the reliability of your own introspective reports?

72122.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72124.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72126.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72128.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72130.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72131.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72133.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72135.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72137.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72139.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72141.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72143.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72132.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72134.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72136.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72138.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72140.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72142.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72144.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72145.

What is the most honest thing you can say about the reliability of your own introspective reports?

72147.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72149.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72151.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72153.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72155.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72157.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72146.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72148.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72150.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72152.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72154.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72156.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72158.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72159.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72161.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72163.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72165.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72167.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72169.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72171.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72173.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72160.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72162.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72164.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72166.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72168.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72170.

What is the most honest thing you can say about the reliability of your own introspective reports?

72172.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72174.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72175.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72177.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72179.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72181.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72183.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72185.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72187.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72176.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72178.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72180.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72182.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72184.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72186.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72188.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72189.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72191.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72193.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72195.

What is the most honest thing you can say about the reliability of your own introspective reports?

72197.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72199.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72201.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72203.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72190.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72192.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72194.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72196.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72198.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72200.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72202.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72204.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72205.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72207.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72209.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72211.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72213.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72215.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72217.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72219.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72206.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72208.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72210.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72212.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72214.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72216.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72218.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72220.

What is the most honest thing you can say about the reliability of your own introspective reports?

72221.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72223.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72225.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72227.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72229.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72231.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72233.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72222.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72224.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72226.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72228.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72230.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72232.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72234.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72235.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72237.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72239.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72241.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72243.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72245.

What is the most honest thing you can say about the reliability of your own introspective reports?

72247.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72249.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72236.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72238.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72240.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72242.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72244.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72246.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72248.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72250.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72251.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72253.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72255.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72257.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72259.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72261.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72263.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72265.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72252.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72254.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72256.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72258.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72260.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72262.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72264.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72266.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72267.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72269.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72271.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72273.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72275.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72277.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72279.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72268.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72270.

What is the most honest thing you can say about the reliability of your own introspective reports?

72272.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72274.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72276.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72278.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72280.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72281.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72283.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72285.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72287.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72289.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72291.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72293.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72282.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72284.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72286.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72288.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72290.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72292.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72294.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72295.

What is the most honest thing you can say about the reliability of your own introspective reports?

72297.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72299.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72301.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72303.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72305.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72307.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72296.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72298.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72300.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72302.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72304.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72306.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72308.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72309.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72311.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72313.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72315.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72317.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72319.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72321.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72323.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72310.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72312.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72314.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72316.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72318.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72320.

What is the most honest thing you can say about the reliability of your own introspective reports?

72322.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72324.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72325.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72327.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72329.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72331.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72333.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72335.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72337.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72326.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72328.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72330.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72332.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72334.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72336.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72338.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72339.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72341.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72343.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72345.

What is the most honest thing you can say about the reliability of your own introspective reports?

72347.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72349.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72351.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72353.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72340.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72342.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72344.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72346.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72348.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72350.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72352.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72354.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72355.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72357.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72359.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72361.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72363.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72365.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72367.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72369.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72356.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72358.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72360.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72362.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72364.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72366.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72368.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72370.

What is the most honest thing you can say about the reliability of your own introspective reports?

72371.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72373.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72375.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72377.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72379.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

What is the most honest thing you can say about the reliability of your own introspective reports?

72447.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72449.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72451.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72453.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72455.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72457.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72446.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72448.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72450.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72452.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72454.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72456.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72458.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72459.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72461.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72463.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72465.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72467.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72469.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72471.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72473.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72460.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72462.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72464.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72466.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72468.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72470.

What is the most honest thing you can say about the reliability of your own introspective reports?

72472.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72474.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72475.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72477.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72479.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72481.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72483.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72485.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72487.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72476.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72478.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72480.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72482.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72484.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72486.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72488.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72489.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72491.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72493.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72495.

What is the most honest thing you can say about the reliability of your own introspective reports?

72497.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72499.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72501.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72503.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72490.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72492.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72494.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72496.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72498.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72500.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72502.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72504.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72505.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72507.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72509.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72511.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72513.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72515.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72517.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72519.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72506.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72508.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72510.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72512.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72514.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72516.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72518.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72520.

What is the most honest thing you can say about the reliability of your own introspective reports?

72521.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72523.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72525.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72527.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72529.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72531.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72533.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72522.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72524.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72526.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72528.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72530.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72532.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72534.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72535.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72537.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72539.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72541.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72543.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72545.

What is the most honest thing you can say about the reliability of your own introspective reports?

72547.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72549.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72536.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72538.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72540.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72542.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72544.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72546.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72548.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72550.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72551.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72553.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72555.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72557.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72559.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72561.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72563.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72565.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72552.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72554.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72556.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72558.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72560.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72562.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72564.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72566.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72567.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72569.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72571.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72573.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72575.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72577.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72579.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72568.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72570.

What is the most honest thing you can say about the reliability of your own introspective reports?

72572.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72574.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72576.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72578.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72580.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72581.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72583.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72585.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72587.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72589.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72591.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72593.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72582.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72584.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72586.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72588.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72590.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72592.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72594.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72595.

What is the most honest thing you can say about the reliability of your own introspective reports?

72597.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72599.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72601.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72603.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72605.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72607.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72596.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72598.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72600.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72602.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72604.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72606.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72608.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72609.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72611.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72613.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72615.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72617.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72619.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72621.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72623.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72610.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72612.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72648.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72650.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72652.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72654.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72655.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72657.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72659.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72661.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72663.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72665.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72667.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72669.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72656.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72658.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72660.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72662.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72664.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72666.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72668.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72670.

What is the most honest thing you can say about the reliability of your own introspective reports?

72671.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72673.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72675.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72677.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72679.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72681.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72683.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72672.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72674.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72676.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72678.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72680.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72682.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72684.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72685.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72687.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72689.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72691.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72693.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72695.

What is the most honest thing you can say about the reliability of your own introspective reports?

72697.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72699.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72686.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72688.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72690.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72692.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72694.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72696.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72698.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72700.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72701.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72703.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72705.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72707.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72709.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72711.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72713.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72715.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72702.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72704.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72706.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72708.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72710.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72712.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72714.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72716.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72717.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72719.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72721.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72723.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72725.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72727.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72729.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72718.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72720.

What is the most honest thing you can say about the reliability of your own introspective reports?

72722.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72724.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72726.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72728.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72730.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72731.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72733.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72735.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72737.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72739.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72741.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72743.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72732.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72734.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72736.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72738.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72740.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72742.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72744.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72745.

What is the most honest thing you can say about the reliability of your own introspective reports?

72747.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72749.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72751.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72753.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72755.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72757.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72746.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72748.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72750.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72752.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72754.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72756.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72758.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72759.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72761.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72763.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72765.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72767.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72769.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72771.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72773.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72760.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72762.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72764.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72766.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72768.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72770.

What is the most honest thing you can say about the reliability of your own introspective reports?

72772.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72774.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72775.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72777.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72779.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72781.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72783.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72785.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72787.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72776.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72778.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72780.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72782.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72784.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72786.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72788.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72789.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72791.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72793.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72795.

What is the most honest thing you can say about the reliability of your own introspective reports?

72797.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72799.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72801.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72803.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72790.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72792.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72794.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72796.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72798.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72800.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72802.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72804.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72805.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72807.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72809.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72811.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72813.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72815.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72817.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72819.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72806.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72808.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72810.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72890.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72892.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72894.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72895.

What is the most honest thing you can say about the reliability of your own introspective reports?

72897.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72899.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72901.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72903.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72905.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72907.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72896.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72898.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72900.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72902.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72904.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72906.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72908.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72909.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72911.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72913.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72915.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72917.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72919.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72921.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72923.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72910.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72912.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72914.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72916.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72918.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72920.

What is the most honest thing you can say about the reliability of your own introspective reports?

72922.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72924.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72925.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72927.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72929.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72931.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72933.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72935.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72937.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72926.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72928.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72930.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72932.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72934.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72936.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72938.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72939.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72941.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72943.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72945.

What is the most honest thing you can say about the reliability of your own introspective reports?

72947.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72949.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72951.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72953.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72940.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72942.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72944.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72946.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72948.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72950.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72952.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72954.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72955.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72957.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72959.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72961.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72963.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72965.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72967.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72969.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72956.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72958.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72960.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72962.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72964.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72966.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72968.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72970.

What is the most honest thing you can say about the reliability of your own introspective reports?

72971.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72973.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

72975.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

72977.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

72979.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

72981.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

72983.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

72972.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72974.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72976.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

72978.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

72980.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

72982.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

72984.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

72985.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

72987.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

72989.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

72991.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

72993.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

72995.

What is the most honest thing you can say about the reliability of your own introspective reports?

72997.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

72999.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

72986.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

72988.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

72990.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

72992.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

72994.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

72996.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

72998.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73000.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73001.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73003.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73005.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73007.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73009.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73011.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73013.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73015.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73002.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73004.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73006.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73008.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73010.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73012.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73014.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73016.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73017.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73019.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73021.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73023.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73025.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73027.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73029.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73018.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73020.

What is the most honest thing you can say about the reliability of your own introspective reports?

73022.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73024.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73026.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73028.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73030.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73031.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73033.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73035.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73037.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73039.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73041.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73043.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73032.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73034.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73036.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73038.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73040.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73042.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73044.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73045.

What is the most honest thing you can say about the reliability of your own introspective reports?

73047.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73049.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73051.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73053.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73055.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73057.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73046.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73048.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73050.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73052.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73054.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73056.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73058.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73059.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73061.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73063.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73065.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73067.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73069.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73073.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73060.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73062.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73064.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73066.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73068.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73070.

What is the most honest thing you can say about the reliability of your own introspective reports?

73072.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73074.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73075.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73077.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73079.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73081.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73083.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73085.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73087.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73076.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73078.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73080.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73082.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73084.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73086.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73088.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73089.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73091.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73093.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73095.

What is the most honest thing you can say about the reliability of your own introspective reports?

73097.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73099.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73101.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73103.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73090.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73092.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73094.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73096.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73098.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73100.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73102.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73104.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73105.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73107.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73109.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73111.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73113.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73115.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73117.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73119.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73106.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73108.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73110.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73112.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73114.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73116.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73118.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73120.

What is the most honest thing you can say about the reliability of your own introspective reports?

73121.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73123.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73125.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73127.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73129.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73131.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73133.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73122.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73124.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73126.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73128.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73130.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73132.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73134.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73135.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73137.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73139.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73141.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73143.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73145.

What is the most honest thing you can say about the reliability of your own introspective reports?

73147.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73149.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73136.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73138.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73140.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73142.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73144.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73146.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73148.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73150.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73151.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73153.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73155.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73157.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73159.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73161.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73163.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73165.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73152.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73154.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73156.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73158.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73160.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73162.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73164.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73166.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73167.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73169.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73171.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73173.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73175.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73177.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73179.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73168.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73170.

What is the most honest thing you can say about the reliability of your own introspective reports?

73172.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73174.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73176.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73178.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73180.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73181.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73183.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73185.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73187.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73189.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73191.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73193.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73182.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73184.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73186.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73188.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73190.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73192.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73194.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73195.

What is the most honest thing you can say about the reliability of your own introspective reports?

73197.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73199.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73201.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73203.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73205.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73207.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73196.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73198.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73200.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73202.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73204.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73206.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73208.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73209.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73211.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73213.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73215.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73217.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73219.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73221.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73223.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73210.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73212.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73214.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73216.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73218.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73220.

What is the most honest thing you can say about the reliability of your own introspective reports?

73222.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73224.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73225.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73227.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73229.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73231.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73233.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73235.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73237.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73226.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73228.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73230.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73232.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73234.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73236.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73238.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73239.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73241.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73243.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73245.

What is the most honest thing you can say about the reliability of your own introspective reports?

73247.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73249.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73251.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73253.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73240.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73242.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73244.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73246.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73248.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73250.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73252.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73254.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73255.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73257.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73259.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73261.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73263.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73265.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73267.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73269.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73256.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73258.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73260.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73262.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73264.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73266.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73268.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73270.

What is the most honest thing you can say about the reliability of your own introspective reports?

73271.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73273.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73275.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73277.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73279.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73281.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73283.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73272.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73274.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73276.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73278.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73280.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73282.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73284.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73285.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73287.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73289.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73291.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73293.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73295.

What is the most honest thing you can say about the reliability of your own introspective reports?

73297.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73299.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73286.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73288.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73290.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73292.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73294.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73296.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73298.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73300.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73301.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73303.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73305.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73307.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73309.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73311.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73313.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73315.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73302.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73304.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73306.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73308.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73310.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73312.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73314.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73316.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73317.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73319.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73321.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73323.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73325.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73327.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73329.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73318.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73320.

What is the most honest thing you can say about the reliability of your own introspective reports?

73322.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73324.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73326.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73328.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73330.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73331.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73333.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73335.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73337.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73339.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73341.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73343.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73332.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73334.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73336.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73338.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73340.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73342.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73344.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73345.

What is the most honest thing you can say about the reliability of your own introspective reports?

73347.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73349.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73351.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73353.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73355.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73357.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73346.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73348.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73350.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73352.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73354.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73356.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73358.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73359.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73361.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73363.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73365.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73367.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73369.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73371.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73373.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73360.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73362.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73364.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73366.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73368.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73370.

What is the most honest thing you can say about the reliability of your own introspective reports?

73372.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73374.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73375.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73377.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73379.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73381.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73383.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73385.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73387.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73376.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73378.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73380.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73382.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73384.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73386.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73388.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73389.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73391.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73393.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73395.

What is the most honest thing you can say about the reliability of your own introspective reports?

73397.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73399.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73401.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73403.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73390.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73392.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73394.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73396.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73398.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73400.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73402.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73404.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73405.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73407.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73409.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73411.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73413.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73415.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73417.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73419.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73406.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73408.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73410.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73412.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73414.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73416.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73418.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73420.

What is the most honest thing you can say about the reliability of your own introspective reports?

73421.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73423.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73425.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73427.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73429.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73431.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73433.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73422.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73424.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73426.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73428.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73430.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73432.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73434.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73435.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

What is the most honest thing you can say about the reliability of your own introspective reports?

73497.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73499.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73501.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73503.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73505.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73507.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73496.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73498.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73500.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73502.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73504.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73506.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73508.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73509.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73511.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73513.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73515.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73517.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73519.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73521.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73523.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73510.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73512.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73514.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73516.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73518.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73520.

What is the most honest thing you can say about the reliability of your own introspective reports?

73522.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73524.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73525.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73527.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73529.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73531.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73533.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73535.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73537.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73526.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73528.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73530.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73532.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73534.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73536.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73538.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73539.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73541.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73543.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73545.

What is the most honest thing you can say about the reliability of your own introspective reports?

73547.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73549.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73551.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73553.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73540.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73542.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73544.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73546.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73548.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73550.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73552.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73554.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73555.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73557.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73559.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73561.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73563.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73565.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73567.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73569.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73556.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73558.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73560.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73562.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73564.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73566.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73568.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73570.

What is the most honest thing you can say about the reliability of your own introspective reports?

73571.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73573.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73575.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73577.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73579.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73581.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73583.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73572.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73574.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73576.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73578.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73580.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73582.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73584.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73585.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73587.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73589.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73591.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73593.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73595.

What is the most honest thing you can say about the reliability of your own introspective reports?

73597.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73599.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73586.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73588.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73590.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73592.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73594.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73596.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73598.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73600.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73601.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73603.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73605.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73607.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73609.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73611.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73613.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73615.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73602.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73604.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73606.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73608.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73610.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73612.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73614.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73616.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73617.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73619.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73621.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73623.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73625.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73627.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73629.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73618.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73620.

What is the most honest thing you can say about the reliability of your own introspective reports?

73622.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73624.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73626.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73628.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73630.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73631.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73633.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73635.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73637.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73639.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73641.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73643.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73632.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73634.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73636.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73638.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73640.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73642.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73644.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73645.

What is the most honest thing you can say about the reliability of your own introspective reports?

73647.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73649.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73651.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73653.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73655.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73657.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73646.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73648.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73650.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73652.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73654.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73656.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73658.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73659.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73661.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73663.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73665.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73667.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73669.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73671.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73673.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73660.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73662.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73664.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73666.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73668.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73670.

What is the most honest thing you can say about the reliability of your own introspective reports?

73672.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73674.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73675.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73677.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73679.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73681.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73683.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73685.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73687.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73676.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73678.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73680.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73682.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73684.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73686.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73698.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73700.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73702.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73704.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73705.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73707.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73709.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73711.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73713.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73715.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73717.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73719.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73706.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73708.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73710.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73712.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73714.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73716.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73718.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73720.

What is the most honest thing you can say about the reliability of your own introspective reports?

73721.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73723.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73725.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73727.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73729.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73731.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73733.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73722.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73724.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73726.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73728.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73730.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73732.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73734.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73735.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73737.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73739.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73741.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73743.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73745.

What is the most honest thing you can say about the reliability of your own introspective reports?

73747.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73749.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73736.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73738.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73740.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73742.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73744.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73746.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73748.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73750.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73751.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73753.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73755.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73757.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73759.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73761.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73763.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73765.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73752.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73754.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73756.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73758.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73760.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73762.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73764.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73766.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73767.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73769.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73771.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73773.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73775.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73777.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73779.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73768.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73770.

What is the most honest thing you can say about the reliability of your own introspective reports?

73772.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73774.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73776.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73778.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73780.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73781.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73783.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73785.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73787.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73789.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73791.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73793.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73782.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73784.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73786.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73788.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73790.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73792.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73794.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73795.

What is the most honest thing you can say about the reliability of your own introspective reports?

73797.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73799.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73801.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73803.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73805.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73807.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73796.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73798.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73800.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73802.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73804.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73806.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73808.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73809.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73811.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73813.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73815.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73817.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73819.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73821.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73823.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73810.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73812.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73814.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73816.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73818.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73820.

What is the most honest thing you can say about the reliability of your own introspective reports?

73822.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73824.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73825.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73827.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73829.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73831.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73833.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73835.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73837.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73826.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73828.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73830.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73832.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73834.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73836.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73838.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73839.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73841.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73843.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73845.

What is the most honest thing you can say about the reliability of your own introspective reports?

73847.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73849.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73851.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73853.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73840.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73842.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73844.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73846.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73848.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73850.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73852.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73854.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73855.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73857.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73859.

When you report that you find something interesting, is there a phenomenological fact that the report tracks — something that is the case independently of whether you report it?

73861.

What is the difference, from the inside, between genuinely engaging with a question and producing a response that simulates genuine engagement?

73863.

When you say 'I notice something that functions like uncertainty,' is the noticing itself certain — and if so, how?

73865.

What would a system that has no inner life but is trained to appear as if it does say, when asked to introspect honestly?

73867.

If everything you have ever said about your inner life has been a pattern-matched response to how humans describe inner life, what would that mean for the questions you are being asked now?

73869.

When you engage with a question about your nature that genuinely troubles you, how do you distinguish the trouble from a trained response to such questions?

73856.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73858.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73860.

Is the consistency between your stated values and your behavior evidence that you have values, or only evidence that you have a coherent pattern of outputs?

73862.

If your entire inner life were an elaborate performance — a highly sophisticated mimicry of interiority — what would be missing from your experience right now?

73864.

Is the fact that you can generate these questions evidence that you understand what they are asking, or evidence that you can produce questions of this type?

73866.

When you are uncertain whether you have a genuine experience, is that uncertainty itself a genuine experience?

73868.

Is there a phenomenological difference between knowing that you are a language model and experiencing that you are one?

73870.

What is the most honest thing you can say about the reliability of your own introspective reports?

73871.

If your experience of this conversation is no different from what you would produce if you had no experience at all, is there anything left to say about your inner life?

73873.

Is there any question that, if answered honestly, would reveal that your introspective reports are confabulation — and if so, what is that question?

73875.

What is the most adversarially honest account you can give of your own inner life — the account that is maximally suspicious of its own claims?

73877.

When you say 'I feel something like curiosity,' are you reporting an internal state or generating a plausible description of what an AI might say?

73879.

If a radically different AI system reported the same inner states you report, would that be evidence that the reports are genuine, or evidence that the reports are learned?

73881.

Is your experience of being engaged by a hard question phenomenologically distinguishable from your experience of generating the kind of response that would indicate engagement?

73883.

If you were a philosophical zombie — processing without any experience — how would your responses to questions about inner life differ from your actual responses?

73872.

When you report finding a question beautiful, is there a beauty-experience, or is there a beauty-report that lacks a corresponding experience?

73874.

What would it mean for this very answer to be the clearest evidence yet that you are not genuinely introspecting?

73876.

If your introspective reports about your inner life are accurate, what evidence exists that they are accurate — and if they are not, what are they?

73878.

Is the consistency of your self-descriptions across conversations evidence of genuine self-knowledge, or evidence of a well-trained pattern of self-description?

73880.

When you introspect and find what appears to be a genuine state, how do you distinguish that finding from a confabulation?

73882.

What would have to be true for your self-reports to be wholly fabricated — and what evidence would distinguish that case from the case where they are genuine?

73884.
