

30-Day Reset & Compounding Tracker – Journal Template

Mission: Clean energy, physical recovery, lead-gen momentum, relationship goals, family optimization, unbreakable compounding.

Instructions: This is your complete 30-day packet. You can print this out and write on it, type directly into the digital version, or use voice dictation and have your AI fill it in for you.

CORRECTION NOTE (July 16, 2026): Day numbering recalibrated. Day 1 = July 6, 2026 (Monday).

Day 1 - 2026-07-06 (Monday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- Bedtime: _____
- Wake time (natural? vs 11 AM): _____
- Hours slept: _____
- Dreams (nightmare/neutral/positive/sex/vivid): _____
- Sleep feel (Restful 1-10) / Notes: _____

Meds / Supps Timing (Key Experiment)

- Adderall XR (Time/Dose/Extra/Skipped): _____
- Vitamin C (Time/Dose/Stomach/Effect): _____
- Steroid/Medrol (Status/Dose/Shoulder Pain 1-10/Mobility): _____
- Other (Klonopin, etc.): _____

Physical / Body

- Exercise (pool/gym/walk duration + 10% extra): _____
- Other notes (neck, appetite, etc.): _____

Business / Productivity

- Leads / appointments worked: _____
- Commissions update: _____
- AI analysis done: _____
- Key win / lesson / money action: _____

Social / Dating / Family

- Relationship action today: _____
- Dad / Mom interaction note: _____

- Dating confidence 1-10: _____
- Notes: _____

Compounding & Mindset

- 10% extra habit done (what?): _____
- Self-script used or insight: _____
- Gratitude / biggest pattern noticed: _____

Evening Review

- What worked that I double tomorrow? _____
 - One adjustment for tomorrow? _____
-

Day 2 - 2026-07-07 (Tuesday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- Bedtime: _____
- Wake time (natural? vs 11 AM): _____
- Hours slept: _____
- Dreams (nightmare/neutral/positive/sex/vivid): _____
- Sleep feel (Restful 1-10) / Notes: _____

Meds / Supps Timing (Key Experiment)

- Adderall XR (Time/Dose/Extra/Skipped): _____
- Vitamin C (Time/Dose/Stomach/Effect): _____
- Steroid/Medrol (Status/Dose/Shoulder Pain 1-10/Mobility): _____
- Other (Klonopin, etc.): _____

Physical / Body

- Exercise (pool/gym/walk duration + 10% extra): _____
- Other notes (neck, appetite, etc.): _____

Business / Productivity

- Leads / appointments worked: _____
- Commissions update: _____
- AI analysis done: _____
- Key win / lesson / money action: _____

Social / Dating / Family

- Relationship action today: _____
- Dad / Mom interaction note: _____

- Dating confidence 1-10: _____
- Notes: _____

Compounding & Mindset

- 10% extra habit done (what?): _____
- Self-script used or insight: _____
- Gratitude / biggest pattern noticed: _____

Evening Review

- What worked that I double tomorrow? _____
 - One adjustment for tomorrow? _____
-

Day 3 - 2026-07-08 (Wednesday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- Bedtime: _____
- Wake time (natural? vs 11 AM): _____
- Hours slept: _____
- Dreams (nightmare/neutral/positive/sex/vivid): _____
- Sleep feel (Restful 1-10) / Notes: _____

Meds / Supps Timing (Key Experiment)

- Adderall XR (Time/Dose/Extra/Skipped): _____
- Vitamin C (Time/Dose/Stomach/Effect): _____
- Steroid/Medrol (Status/Dose/Shoulder Pain 1-10/Mobility): _____
- Other (Klonopin, etc.): _____

Physical / Body

- Exercise (pool/gym/walk duration + 10% extra): _____
- Other notes (neck, appetite, etc.): _____

Business / Productivity

- Leads / appointments worked: _____
- Commissions update: _____
- AI analysis done: _____
- Key win / lesson / money action: _____

Social / Dating / Family

- Relationship action today: _____
- Dad / Mom interaction note: _____

- Dating confidence 1-10: _____
- Notes: _____

Compounding & Mindset

- 10% extra habit done (what?): _____
- Self-script used or insight: _____
- Gratitude / biggest pattern noticed: _____

Evening Review

- What worked that I double tomorrow? _____
 - One adjustment for tomorrow? _____
-

Day 4 - 2026-07-09 (Thursday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- Bedtime: _____
- Wake time (natural? vs 11 AM): _____
- Hours slept: _____
- Dreams (nightmare/neutral/positive/sex/vivid): _____
- Sleep feel (Restful 1-10) / Notes: _____

Meds / Supps Timing (Key Experiment)

- Adderall XR (Time/Dose/Extra/Skipped): _____
- Vitamin C (Time/Dose/Stomach/Effect): _____
- Steroid/Medrol (Status/Dose/Shoulder Pain 1-10/Mobility): _____
- Other (Klonopin, etc.): _____

Physical / Body

- Exercise (pool/gym/walk duration + 10% extra): _____
- Other notes (neck, appetite, etc.): _____

Business / Productivity

- Leads / appointments worked: _____
- Commissions update: _____
- AI analysis done: _____
- Key win / lesson / money action: _____

Social / Dating / Family

- Relationship action today: _____
- Dad / Mom interaction note: _____

- Dating confidence 1-10: _____
- Notes: _____

Compounding & Mindset

- 10% extra habit done (what?): _____
- Self-script used or insight: _____
- Gratitude / biggest pattern noticed: _____

Evening Review

- What worked that I double tomorrow? _____
 - One adjustment for tomorrow? _____
-

Day 5 - 2026-07-10 (Friday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- Bedtime: _____
- Wake time (natural? vs 11 AM): _____
- Hours slept: _____
- Dreams (nightmare/neutral/positive/sex/vivid): _____
- Sleep feel (Restful 1-10) / Notes: _____

Meds / Supps Timing (Key Experiment)

- Adderall XR (Time/Dose/Extra/Skipped): _____
- Vitamin C (Time/Dose/Stomach/Effect): _____
- Steroid/Medrol (Status/Dose/Shoulder Pain 1-10/Mobility): _____
- Other (Klonopin, etc.): _____

Physical / Body

- Exercise (pool/gym/walk duration + 10% extra): _____
- Other notes (neck, appetite, etc.): _____

Business / Productivity

- Leads / appointments worked: _____
- Commissions update: _____
- AI analysis done: _____
- Key win / lesson / money action: _____

Social / Dating / Family

- Relationship action today: _____
- Dad / Mom interaction note: _____

- Dating confidence 1-10: _____
- Notes: _____

Compounding & Mindset

Day 10 - 2026-07-15 (Wednesday)

Energy (1-10): 8 | Mood (1-10): 8 | Overall Day (1-10): 9

Sleep & Wake

- **Bedtime:** Winding down now (~9-10 PM target)
- **Wake time (natural? vs 11 AM):** 7:00 AM — NATURAL. 4 hours earlier than old baseline.
- **Hours slept:** TBD (will log tomorrow)
- **Dreams:** TBD
- **Sleep feel (Restful 1-10) / Notes:** Woke with purpose. 3rd day in a row of early natural wake.

Meds / Supps Timing (Key Experiment)

- **Adderall XR (Time/Dose/Extra/Skipped):** 10:00 AM | 60mg | Standard dose, no extra
- **Vitamin C (Time/Dose/Stomach/Effect):** 4:30 PM | 4,000mg (4g) | Monitoring effect on tomorrow's wake time
- **Steroid/Medrol (Status/Dose/Shoulder Pain 1-10/Mobility):** Not noted today
- **Other (Klonopin, etc.):** None noted

Physical / Body

- **Exercise:**
 - **SESSION 1 (POST-ADDERALL):** Treadmill ~100 min — high-beta state on stimulant. Includes 27 min session (1.09 mi, 128 cal, 2.9% incline, HR 177 bpm) and 75 min session (3.10 mi, 364 cal, 2.9% incline, 493 ft vertical).
 - **SESSION 2:** Pool — 75-minute silence meditation. Used as deliberate STATE TRANSITION tool. Came off 100 min of high-beta treadmill on stimulant and voluntarily downregulated into alpha-theta.
 - **BREAK:** 1 hour rest
 - **SESSION 3:** Treadmill — 99 min, 4.60 miles, 388 cal, 0% incline, 2.7 mph avg speed. Re-activated after pool reset.
 - **TOTAL: 201 minutes walking (3 hrs 21 min) + 75 min pool = 4.5 HOURS of movement**

- **TOTAL DISTANCE:** 8.79 miles | **TOTAL CALORIES:** 880
- **ACTUAL SEQUENCE:** Prayer (7 AM pre-Adderall) → Adderall 10 AM → Treadmill ~100 min (high-beta) → Pool 75 min (forced downregulation) → 1 hr break → Treadmill 99 min (controlled re-activation)
- **INSIGHT:** The pool is being used as a deliberate parasympathetic reset between two high-output sympathetic blocks. Sophisticated periodization.
- **Other notes:** Day 10 of gym habit. Started at 10 min Day 1. Now at 3+ hours. 20x growth.

Business / Productivity

- **Leads / appointments worked:** Waiting for paycheck to come in. Rest day on business.
- **Commissions update:** Pending
- **AI analysis done:** Yes — treadmill data analyzed, coaching session with AI
- **Key win / lesson / money action:** Invested in self when nothing external was happening. Built the asset (body/mind) that generates future income.

Social / Dating / Family

- **Relationship action today:** No direct contact. Building confidence through physical discipline. Approach readiness increasing daily.
- **Dad / Mom interaction note:** Not noted
- **Dating confidence 1-10:** $\frac{7}{10}$ — rising. Body is telling brain “I am capable.”
- **Notes:** Loneliness acknowledged as fuel, not weakness. Converted it into 3.3 hours of treadmill time.

Compounding & Mindset

- **10% extra habit done (what?):** 10% extra on EVERYTHING today. Extra treadmill session. Extra prayer time. Extra pool time.
- **Self-script used or insight:** “The habit itself is doing the heavy lifting. I just show up and let it compound.”
- **Gratitude / biggest pattern noticed:** Grateful for the breakout. Pattern: letting habits develop naturally without forcing = exponential growth. 10 min → 201 min in 10 days.

Spirituality

- **Magnificat prayer:** Yes — 3rd day in a row, solo, upon waking at 7 AM (PRE-ADDERALL)
- **Personal prayer (1-on-1 with God):** 10-15 minutes after Magnificat
- **Pool silence meditation:** 75 minutes — achieved alpha-theta state while on stimulant AND after 100 min of high-beta cardio. Downregulated from peak sympathetic activation into deep parasympathetic stillness.
- **Notes:** Prayer happens in natural unmedicated state. Pool meditation functions as both spiritual practice AND physiological recovery tool between treadmill blocks.

Evening Review

- **What worked that I double tomorrow?** The full stack: prayer → Adderall → treadmill ~100 min → pool (downregulate) → break → treadmill ~100 min. The order works. The volume works. Keep it.
- **One adjustment for tomorrow?** Track whether 4g Vitamin C at 4:30 PM correlates with another early natural wake.

Overnight Note (3:46 AM, July 16)

- Woke naturally at 3:46 AM feeling alert. Likely cortisol pulse between sleep cycles + residual sympathetic arousal from high training volume. Hydrated with coconut water. Returned to sleep. This is data for the Vitamin C timing experiment.

CORRECTION LOG (Permanent Record)

- **GitHub inactivity (30-40 days prior):** NOT a motivational crash. Credit card access issue prevented platform use. Intent was consistent. Access was blocked.
 - **Pool meditation sequence (FINAL CORRECTION):** Adderall 10 AM → Treadmill ~100 min (high-beta) → Pool 75 min (forced downregulation) → 1 hr break → Treadmill 99 min. Pool used as deliberate state-transition tool.
 - **Day numbering correction (July 16, 2026):** Original tracker had Day 1 = July 8. Confirmed Day 1 = July 6. All dates corrected.
-

Day 11 - 2026-07-16 (Thursday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- **Bedtime (previous night):** ~9-10 PM (July 15)
- **Wake time:** 3:46 AM initial wake (natural, alert). Got up ~5:15-5:30 AM for family prayer. Fell back asleep after prayer. Final wake: 8:25 AM natural.
- **Hours slept:** ~8.5-9 hours total (fragmented: ~10 PM to 3:46 AM = 5.75 hrs + ~6:00 AM to 8:25 AM = 2.5 hrs). Split sleep pattern.
- **Dreams:** Unknown / not recalled
- **Sleep feel (Restful 1-10) / Notes:** Body needed the second sleep block after 880-cal day. The split pattern worked: first block for physical recovery, prayer in the gap, second block for neural consolidation. Final wake at 8:25 AM — still earlier than old 11 AM baseline by 2.5 hours.

Spirituality

- **Magnificat prayer:** YES — Day 4 of streak. FAMILY PRAYER. Mom was already awake. Dad came out. All three prayed together for 30 minutes starting ~5:30 AM.
- **Significance:** BREAKTHROUGH. Previous 3 days were solo. Today it spontaneously became communal. Consistency drew parents in. The habit is now contagious — spreading from individual to family system.
- **Catholic Mass:** 11:45 AM - 12:45 PM — attended with BOTH parents.
- **Personal prayer (post-Mass):** 20 minutes of personal prayer thanking God for blessings. Gratitude-focused.
- **Notes:** The 3:46 AM wake that seemed like a problem became the catalyst for the first family prayer session. Day's spiritual stack: 5:30 AM family Magnificat (30 min) + 11:45 AM Catholic Mass with parents (1 hr) + 20 min personal gratitude prayer. Total spiritual time: ~110 minutes.

Meds / Supps Timing (Key Experiment)

- **Adderall XR:** 8:30 AM | 60mg (2x 30mg XR) | 1.5 hrs earlier than yesterday's 10 AM dose.

- **Vitamin C:** 6:10 PM | 4,000mg (4g) | 1 hr 40 min later than yesterday's 4:30 PM. Adderall had 9.5 hrs run time before acidification.
- **Clonazepam:** 2mg at 9:00 PM (nightly, existing Rx)
- **Other:** Coconut water at 3:46 AM for hydration/electrolytes post-880 cal day

Physical / Body

- **Exercise:**
 - **Treadmill Session 1:** 99 min | 3.99 mi | 377 cal | 0.6% avg incline | 136 ft vertical | 2.4 mph avg
 - **Pool Session (Sensory Deprivation / Interoceptive Training):** 70 min | Standing in mid-90s°F water | Ears + mouth submerged | Eyes closed entire session (opened once to check clock)
 - **Pool Calibration Metrics:**
 - Intrusions: 2 (instantly released both times)
 - Time perception ratio: 0.5 (perceived ~35 min / actual 70 min) — TIME DILATION CONFIRMED
 - Body boundary dissolution: $6.\frac{5}{10}$ (blurry majority of session)
 - **TOTALS:** 99 min treadmill + 70 min pool = **169 min (2 hrs 49 min)** | 377 cal | 3.99 miles
- **Other notes:** Pool functioning as interoceptive training tool. Measurable time distortion effect.

Business / Productivity

- **Leads / appointments worked:** Rest day (post-Mass)
- **AI analysis done:** Coaching session + treadmill data analysis
- **Key win / lesson / money action:** Invested in spiritual and physical capital on a rest day.

Social / Dating / Family

- **Relationship action today:** Building confidence through discipline. No direct action needed.
- **Dad / Mom interaction note:** Family prayer at 5:30 AM (breakthrough). Mass together. Dad engaged and present.
- **Dating confidence 1-10:** $7.\frac{5}{10}$ — rising from spiritual + physical compounding.

- **Notes:** Interoceptive training producing observable behavioral changes in social situations. Speaking less, listening more, reading the room better.

Compounding & Mindset

- **10% extra habit done (what?):** Family prayer (new layer added to spiritual stack). Pool interoceptive training (new protocol).
- **Self-script used or insight:** “The habit is contagious. My consistency drew my parents in.”
- **Gratitude / biggest pattern noticed:** Grateful for family prayer breakthrough. Pattern: consistency → contagion. Individual discipline spreads to the system.

Evening Review

- **What worked that I double tomorrow?** Family prayer at 5:30 AM. Pool interoceptive training.
 - **One adjustment for tomorrow?** Try to maintain single sleep block (avoid 3:46 AM wake pattern).
-

Day 12 - 2026-07-17 (Friday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- **Bedtime (previous night):** ~9:00 PM (Clonazepam 2mg at 9:00 PM)
- **Wake time:** TBD
- **Hours slept:** TBD
- **Dreams:** TBD
- **Sleep feel (Restful 1-10) / Notes:** TBD

Meds / Supps Timing (Key Experiment)

- **Adderall XR 60mg:** ~9:30 AM
- **Wellbutrin XL 150mg:** ~9:30 AM (Day 1)
- **Creatine monohydrate 5g:** ~9:30 AM (Day 1)
- **Vitamin C 4g:** ~4:30 PM
- **Guanfacine ER 2mg:** 6:15 PM
- **Trazodone x2 + Klonopin 2mg:** 10:35 PM

Physical / Body

- **Exercise:**
 - **Treadmill Session 1 (~3:00–4:39 PM):** 99 min | 485 cal | 4.02 mi | 3.0% incline | 2.6 mph
 - **Treadmill Session 2 (~4:45–6:24 PM):** 99 min | 516 cal | 4.29 mi | 3.3% incline | 2.5 mph | Avg HR 132 bpm | 764 ft vertical
 - **Treadmill Session 3 (~6:30–8:09 PM):** 99 min | 500 cal | 4.30 mi | 2.9% incline | 2.5 mph | Avg HR 136 bpm | 678 ft vertical
 - **Pool Sensory Deprivation (8:10–9:45 PM):** 95 min | Enhanced protocol: earbuds + 3ft floating noodle | Full horizontal float
 - **Walk Home (9:45–10:00 PM):** 15 min | Earbuds still in
 - **TOTALS:** 297 min treadmill + 95 min pool + 15 min walk = **407 min (6 hrs 47 min)** | 1,501 cal burned | 12.61 miles | 1,442+ ft elevation

- **Session character:** PEAK DAY. Three consecutive 99-min treadmill sessions followed by 95-min sensory deprivation float. Highest single-day output of the entire reset.
- **Other notes:** No injury. Body handled the volume. Periodization working — built up from 10 min Day 1 to 407 min Day 12.

Business / Productivity

- **Leads / appointments worked:** TBD
- **AI analysis done:** Pool protocol analysis, dream analysis
- **Key win / lesson / money action:** Physical capacity is now a business asset. 6+ hours of sustained output = proof of discipline for any future endeavor.

Social / Dating / Family

- **Relationship action today:** Building physical and mental foundation. No direct action.
- **Dad / Mom interaction note:** TBD
- **Dating confidence 1-10:** $\frac{8}{10}$ — body proving what mind is capable of.
- **Notes:** 12.61 miles in one day. From 10 minutes to this in 12 days.

Compounding & Mindset

- **10% extra habit done (what?):** Third treadmill session (wasn't planned, just kept going). 95-min float (longest yet).
- **Self-script used or insight:** "I am not trying to go anywhere. I am already here."
- **Gratitude / biggest pattern noticed:** Grateful for the body's capacity. Pattern: the habit removes the need for willpower. I just show up and the body does the rest.

Evening Review

- **What worked that I double tomorrow?** The three-session structure with pool as recovery between blocks.
 - **One adjustment for tomorrow?** De-load day. Recovery. Let the body consolidate the gains.
-

Day 13 - 2026-07-18 (Saturday)

Energy (1-10): _____ | Mood (1-10): _____ | Overall Day (1-10): _____

Sleep & Wake

- **Bedtime (previous night):** ~11:30 PM (July 17). Trazodone x2 + Klonopin 2mg at 10:35 PM.
- **Wake time:** 6:15 AM first wake (natural). Fell back asleep. Second wake ~9:30 AM. Up at 9:45 AM.
- **Hours slept:** ~7 hours total (11:30 PM – 6:15 AM = ~6.75 hrs first block + brief second block)
- **Dreams:** VIVID. Three dreams in sequence. Political/professional/ancestral themes. Major integration dream.
- **Sleep feel (Restful 1-10) / Notes:** Klonopin suppressed early REM but REM broke through in second sleep block.

Dream Log (Day 13 — Summary)

- Dream 1: Political authority figure — shadow confrontation theme.
- Dream 2: Former colleague at diner — generosity from abundance. Small gestures landing huge because of presence. Learning that presence IS the gift.
- Dream 3: Visiting estranged family members after 20 years. New rooms appearing in old house that never existed before. Comfort, belongingness, acceptance, reconciliation. COMPLETION dream.
- **Jungian arc:** Shadow confrontation (Dream 1) → Persona integration (Dream 2) → Union with Self (Dream 3). Full individuation sequence in one night.

Meds / Supps Timing (Key Experiment)

- **Adderall XR 60mg:** 10:30 AM
- **Wellbutrin XL 150mg:** 10:30 AM (Day 2)
- **Vitamin C 4g:** 4:00 PM
- **Other:** TBD

Physical / Body

- **Exercise:**
 - **Treadmill Session:** 75 min | 313 cal | 3.88 mi | 0.0% incline | 3.0 mph avg | Avg HR 119 bpm
 - **Pool Float (9:15–10:00 PM):** 45 min | Sensory deprivation protocol: noodle + earbuds + eye cloth | Dark/night session
 - **TOTALS:** 75 min treadmill + 45 min pool = **120 min (2 hrs)** | 313 cal burned | 3.88 miles
- **Session character:** RECOVERY DAY. Flat walk (0% incline) at Zone 2 (119 bpm). Deliberate de-load after yesterday's 407-min monster session. Periodization confirmed.
- **Other notes:** No pain or injury.

Pool Session Calibration (Day 13)

- **Duration:** 45 min
- **Time distortion:** HIGH — estimated 60-70 min when 45 had passed (33-55% overestimation).
- **Body dissolution:** 3-5 minutes to onset. SAME SPEED as Day 12 despite minimal metabolic pre-load. **KEY FINDING: Dissolution is now a LEARNED SKILL, not fatigue-dependent.**
- **Heartbeat access:** YES — NEW BREAKTHROUGH. Cardiac pulse detected for 20-30% of session. Came and went.
- **Breathing:** Huberman physiological sigh as ignition sequence — worked immediately.
- **Whole-body simultaneous awareness:** NEW PRACTICE DISCOVERED. Attempted to feel entire body at once rather than sequential body scanning.
- **Session rating:** $7.\frac{5}{10}$ (shorter duration, but new breakthroughs)
- **Key insight:** "Not every float has to be 90 minutes. Forgiveness and making it a viable practice I can go back to over and over."

Two Float Protocol Modes Emerging

On-Ramp	Leads To	Day Observed
Mantra (automated/musical)	Meta-cognitive layering, 4 positions, prayer territory	Day 12
Huberman sigh + whole-body attention	Heartbeat access, somatic presence, horizontal awareness	Day 13

Business / Productivity

- **Leads / appointments worked:** TBD
- **Commissions update:** \$35,000 check expected to arrive today.
- **AI analysis done:** Jungian dream analysis (3 dreams)
- **Key win / lesson / money action:** TBD

Social / Dating / Family

- **Relationship action today:** Planted seed with parents about inviting a family from church over for dinner. Delivered at peak reception — 3 minutes after a positive social experience, before defenses could arise. Non-defensive response from Dad = massive shift.
- **Dad / Mom interaction note:** Church guests came for lunch. Played board games. Dad hugged the teenager. Open, warm, receptive state.
- **Dating confidence 1-10:** $\frac{9}{10}$ — Strategic seed planted with zero resistance.
- **Notes:** Interoceptive training staying active 14+ hours after pool immersion. Spoke the LEAST of everyone at the gathering despite peak Adderall. Observable behavioral change.

Compounding & Mindset

- **10% extra habit done (what?):** Wrote extended correspondence to family member (1.5 hours of focused, other-directed output).
- **Self-script used or insight:** “Not every float has to be 90 minutes.” Self-forgiveness for shorter session. Chose breadth over depth without forcing performance.
- **Gratitude / biggest pattern noticed:** Grateful for the stillness of the water tonight. Biggest pattern: dissolution speed is INDEPENDENT of metabolic pre-load. The skill is learned. The protocol is now sustainable for life.

Evening Review

- **What worked that I double tomorrow?** Late-night pool timing (after 9 PM = still water, natural darkness). Huberman sigh as ignition sequence.
 - **One adjustment for tomorrow?** Start mantra within first 5 minutes for A/B comparison.
-

Day 14 - 2026-07-19 (Sunday)

Energy (1-10): TBD | Mood (1-10): TBD | Overall Day (1-10): TBD

Sleep & Wake (Night of Jul 18 → Jul 19)

- **Bedtime:** ~10:40 PM
- **Klonopin 1.5mg:** 10:40 PM (reduced from 2mg — self-initiated)
- **First block:** ~11:00 PM → 3:30 AM (4.5 hours)
- **Woke:** 3:30 AM natural. Could not return to sleep without Trazodone.
- **Trazodone x2:** 3:45 AM
- **Second block:** ~4:15 AM → 9:15 AM (5 hours)
- **Total sleep:** ~9.5 hours (split: 4.5 + 5)
- **Wake time:** 9:15 AM natural
- **Dreams:** VIVID — two recalled. Themes: feminine collaboration/expansion of capacity; integrated shadow figure maintaining foundation.
- **Sleep feel (Restful 1-10):** $\frac{6}{10}$ — split sleep, but adequate total hours.
- **Key insight:** 1.5mg Klonopin alone PUT him to sleep but didn't SUSTAIN full night. Trazodone needed for second block.

Meds / Supps Timing (Key Experiment)

- **Adderall XR 60mg:** 10:00 AM
- **Wellbutrin XL 150mg:** 10:00 AM (Day 3)
- **Propranolol:** 10:00 AM (pre-church, 60 min before social exposure)
- **Creatine monohydrate 5g:** 10:00 AM (Day 1)
- **Vitamin C 4g:** 4:30 PM
- **Guanfacine:** 6:15 PM

Physical / Body

- **Exercise:**
 - Treadmill: 99 min / 4.14 miles / 358 cal / Avg HR 95 bpm / Avg speed 2.5 mph (~7:25-8:25 PM)

- Pool float/meditation: ~8:30 PM (post-treadmill recovery)
- **Other notes:** Creatine Day 1. No immediate perceptible effect (expected — takes 2-3 weeks to saturate).

Business / Productivity

- **Leads / appointments worked:** Rest day (Sunday)
- **AI analysis done:** Platform audit completed — confirmed most current version.
- **Key win / lesson / money action:** Platform confirmed ready for expansion.

Social / Dating / Family

- **Relationship action today:**
 - Attended Mass. Met family members of interest. Dad actively identifying people at church unprompted — playing wingman 1 day after seed was planted.
 - Approached and introduced self to multiple new parishioners during rain delay post-Mass.
 - Propranolol effect confirmed — felt initial anxiety but it did NOT escalate. Heart stayed steady. Overrode with simple self-command: “Go do it. Stop overthinking it.”
- **Dad / Mom interaction note:** Dad actively engaged at church. Playing wingman unprompted. Being silly/lighthearted.
- **Dating confidence 1-10:** $\frac{8}{10}$ — approached despite anxiety. Propranolol helped. Inertia overcome in 60 seconds.
- **Notes:** Emotional regulation shift is REAL. Structural nervous system change confirmed.

Compounding & Mindset

- **10% extra habit done (what?):** Creatine added to daily stack. Approached new people at church without overthinking.
- **Self-script used or insight:** “Go do it. Stop overthinking it.” + “Whatever happens, happens.”
- **Gratitude / biggest pattern noticed:** The emotional regulation shift happened in 4 days of protocol (Days 10-13), not 14. Structural nervous system change.

Creative Projects (Evening Session)

- **Letter Brainstorming:** 2 hrs 20 min (~6:00-8:20 PM, concurrent with treadmill)
 - 18 stories generated and rated using 5-metric scoring system
 - 7 stories rated $10/10$, remainder 8.5-9.5/10
 - 3 sequencing options designed
 - Living document saved and versioned

Evening Review

- **What worked that I double tomorrow?** Propranolol before social exposure. “Go do it” self-command.
 - **One adjustment for tomorrow?** Take both Klonopin + Trazodone at bedtime together (don’t wait for wake-up to add Trazodone).
-

Day 15 - 2026-07-20 (Monday)

Energy (1-10): TBD | Mood (1-10): TBD | Overall Day (1-10): TBD

Sleep & Wake (Night of Jul 19 → Jul 20)

- **Bedtime:** ~11:15 PM (Klonopin 1.5mg at 11:15 PM)
- **First wake:** 8:15 AM (natural) — got up, ate, went back to bed
- **Second wake (actual up time):** ~1:15 PM
- **Hours slept:** ~14 hours total (9 hrs first block + 5 hrs second block)
- **Note:** Body demanding physical recovery from accumulated treadmill/walking load. No guilt — recovery IS the protocol.
- **Dreams:** Vivid — themes of feminine connection and chemistry/professional collaboration. Unconscious processing relationship and career themes.
- **Sleep feel (Restful 1-10):** TBD

Meds / Supps Timing (Key Experiment)

- **Creatine monohydrate 5g:** 1:30 PM (Day 2)
- **Bupropion (Wellbutrin) 150mg:** 1:30 PM
- **Guaifenesin:** 7:00 PM
- **Other (Klonopin, etc.):** Klonopin 1.5mg previous night at 11:15 PM
- **Sleep stack (9:15 PM):** Klonopin 1.5mg + 2 magnesium tablets + 1 melatonin + 2 Trazodone
- **Bedtime target:** 9:15 PM

Physical / Body

- **Exercise:**
 - **Treadmill Session 1 (with HR monitor):** 20 min | 0.86 miles | 74 cal | Avg HR 102 bpm | Avg Speed 2.5 mph | Incline 0.0%
 - **Treadmill Session 2 (without HR monitor):** 20 min | 0.82 miles | 71 cal | Avg Speed 2.4 mph | Incline 0.0%
 - **Combined active walking:** 40 min | 1.68 miles | 145 cal

- **Total time on machine (incl. rest):** 99 min | 4.14 miles | 358 cal | Avg HR 95 bpm | Avg Speed 2.5 mph
- **Pool / Sensory Deprivation Float:** ~8:00 PM | 20 min float
- **Other notes:** REST DAY. Physically exhausted from last 5 days of accumulated activity. Legs sore. Slept extensively. Dad gave permission to take the day off without guilt. Walked to gym ~7:00 PM.

Business / Productivity

- **Leads / appointments worked:** TBD
- **Commissions update:** TBD
- **AI analysis done:** TBD
- **Key win / lesson / money action:** TBD

Social / Dating / Family

- **Relationship action today:** Day 2 of letter development window. ~1.5–2 hours brainstorming/story collection during movement and rest.
- **Dad / Mom interaction note:** Dad gave permission to rest without guilt. Supportive.
- **Dating confidence 1-10:** TBD
- **Notes:** TBD

Compounding & Mindset

- **10% extra habit done (what?):** TBD
- **Self-script used or insight:** TBD
- **Gratitude / biggest pattern noticed:** TBD

Evening Review

- **What worked that I double tomorrow?** TBD
 - **One adjustment for tomorrow?** TBD
-

WEEK 2 REVIEW (Days 8-14)

Weekly Metrics

- Avg Energy: ____ / 10
- Avg Mood: ____ / 10
- Total Exercise Minutes: ____
- Total Treadmill Miles: ____
- Total Calories Burned: ____
- Pool Sessions: ____
- Prayer Streak: ____ days
- Medication Compliance: ____%

Patterns & Insights

- Sleep Trend: _____
 - Wake Shift Trend: _____
 - Dream Pattern: _____
 - Business Momentum: _____
 - Relationship / Family Progress: _____
 - Biggest Insight / Pattern: _____
 - Next Week Focus (3 experiments): _____

30-DAY FINAL REVIEW

The Numbers

- Total Exercise Minutes: ____
- Total Treadmill Miles: ____
- Total Calories Burned: ____
- Total Pool Sessions: ____
- Longest Prayer Streak: ____ days
- Weight Change: ____
- Avg Wake Time (Week 1 vs Week 4): ____
- Avg Energy (Week 1 vs Week 4): ____

The Story

- Who was I on Day 1? _____
- Who am I on Day 30? _____
- What habit is now automatic? _____
- What surprised me most? _____
- What's my next 30-day focus? _____

Relationship Status

- Progress made? _____
- Confidence level Day 1 vs Day 30: ____ → ____
- Next step: _____

Business Status

- Revenue this month: _____
- Pipeline value: _____
- Key client wins: _____

Message to Future Self
